Mathematics of Oil Recovery Dominique Guerillot, D. Guérillot, Olivier Guillon, 1990-12 *El-Hi Textbooks and Serials in Print*, 2006 *El-Hi Textbooks & Serials in Print*, 2005, 2005 **Resources in Education**, 1998-10 Numerical Mathematics and Advanced Applications Miloslav Feistauer, Vit Dolejší, Peter Knobloch, Karel Najzar, 2004-08-12 These proceedings collect the major part of the lectures given at ENU MATH2003 the European Conference on Numerical Mathematics and Advanced Applications held in Prague Czech Republic from 18 August to 22 August 2003 The importance of numerical and computational mathematics and scientific computing is permanently growing There is an increasing number of different research areas where numerical simulation is necessary Let us mention fluid dynamics continuum mechanics electromagnetism phase transition cosmology medicine economics finance etc The success of applications of numerical methods is conditioned by changing its basic instruments and looking for new appropriate techniques adapted to new problems as well as new computer architectures The ENUMATH conferences were established in order to provide a forum for discussion of current topics of numerical mathematics They seek to convene leading experts and young scientists with special emphasis on contributions from Europe Recent results and new trends are discussed in the analysis of numerical algorithms as well as in their applications to challenging scientific and industrial problems The first ENUMATH conference was organized in Paris in 1995 then the series continued by the conferences in Heidelberg 1997 Jyväskylä 1999 and Ischia Porto 2001 It was a great pleasure and honour for the Czech numerical community that it was decided at Ischia Porto to organize the ENUMATH2003 in Prague It was the first time when this conference crossed the former Iron Curtain and was organized in a postsocialist country Symmetry Theory in Molecular Physics with Mathematica William McClain, 2010-03-12 After a few initial chapters on the basics of Mathematica the logic of the book is controlled by group theory It continues to teach Mathematica by example as the need arises so an important use is always at hand for any new operator that is taught To many science students this is a greatly preferred way of learning a new computer language The main part of the book follows a strictly logical development that should be acceptable to the most rigorous minded people while maintaining an engaging style in the spirit of Numerical Recipes by Press Flannery Teukolsky and Vetterling The essence of this style is to be just a little opinionated about good and bad ways to calculate things but to give such advice without provoking offense and always on an objective basis After this comes the development of classes and irreducible representations culminating in a complete proof that for every group the number of classes is equal to the number of representations so that all character tables must be square The proof is motivated throughout by numerical constructions that rouse curiosity and draw the reader into a rediscovery of Schur's Lemmas which thereby become truly interesting results rather than the mysterious dry statements often presented This section culminates in a method for calculating the entire character table of a group This is especially important for permutation groups that describe flexible molecules for which are

there very few published character tables Once the character tables are established the real meat of physical applications can begin The author emphasizes that every application has the same structure 1 The construction of a reducible representation on the basis of some physical property 2 its separation into irreducible components and 3 the interpretation in terms of the symmetry species so produced Because Mathematica and the xyz representations are close at hand the separation into irreducible components can be done quickly Proceedings of the American Mathematical Society American Mathematical Society,1976 Contains the material formerly published in even numbered issues of the Bulletin of the American Mathematical Society Children's Books in Print R R Bowker Publishing,Bowker,1999-12 **Mathematical Reviews** ,2008 *El-Hi Textbooks & Serials in Print, 2003* ,2003 *New Serial Titles* ,1981 A union list of serials commencing publication after Dec 31 1949 *The Cumulative Book Index* ,1999 The theory of determinants in the historical order of its development Thomas Muir,1923 *Madison Hall Notes* ,1913 Pacific Journal of Mathematics ,1987 *Canadian Journal of Mathematics* ,1982 **Interdisciplinary Mathematics** Robert Hermann,1984 **Publications of the Research Institute for Mathematical Sciences** Kyōto Daigaku.
