**Multicultural Math** Claudia Zaslavsky,1994 Provides lesson plans based on the customs of cultures throughout the world for teaching number systems arithmetic measurement mathematical reasoning and related topics to grades three through six    **The Multicultural Math Classroom** Claudia Zaslavsky,1996 The Multicultural Math Classroom inspires cooperation creativity and critical thinking    **Improving Access to Mathematics** Na'ilah Suad Nasir,Paul Cobb,2007 Key experts with extensive research and classroom experience examine how the multiple dimensions of race class culture power and knowledge interact in mathematics classrooms to foster and create inequities Chapters explore new theoretical perspectives describe successful classroom practices and offer insights into how we might develop an effective sociocultural approach to equity in math education Seeing diversity as an instructional resource rather than as an obstacle to be overcome this forward looking volume Helps us to understand the process by which diverse learners experience mathematics education Examines the way students identities can influence their mathematics learning Describes mathematics education programs that have demonstrated their success with poor urban and rural students of color Explains why certain teaching and learning interventions are successful Offers culturally based approaches to mathematics education including activities for the classroom

**Multicultural Mathematics** David Nelson,George Gheverghese Joseph,Julian Williams,1993 The history of mathematics is one of creation and discovery in many parts of the world and yet few people realize that Pythagoras Theorem was known to the Babylonians a thousand years before the Greeks Similarly Pascal's Triangle of 1645 was actually used in practical ways much earlier in China Indeed there is a rich field of African Middle Eastern and Asian mathematics that is often ignored in the teaching of the subject Mathematics then is an international language and field of study that knows no barriers between race culture or creed How can we exploit this rich heritage not only to improve the teaching of mathematics but to prepare our children for life in a multicultural society This pioneering book is the first to explore ways of helping schoolchildren understand the universality of mathematics and at the same time making it a more enjoyable relevant and rewarding enterprise Multicultural Mathematics brings together the experience of three well known teachers and researchers who offer suggestions and guidance for an important new approach to education Written for parents teachers and administrators and with technical mathematics kept to a minimum this book discusses the theories behind multicultural mathematics shows how this method can be applied within the core of any elementary curriculum and explores the educational and social benefits of this new approach to teaching mathematics

*Making Math Learning Fun for Inner City School Students* Glendolyn Duhon-Jeanlouis,Alice Duhon-Ross McCallum,Ashraf Esmail,2010-10-28 Making Math Learning Fun for Inner City School Students is an effective tool for educators and a textbook for professors of higher education The concepts discussed in the book provide a body of knowledge that will enable leaders to understand the critical issues surrounding inner city school students in their ability to learn

mathematical concepts Research shows that three to five teachers of mathematics leave the school system within the first two years of teaching because of frustration experienced while helping inner city school students comprehend and master mathematical skills Students are often discouraged by inappropriate teaching strategies that favor learning math concepts in isolation rather than making them relevant to daily life or cultural experiences Teachers of math must clearly understand inner city school students learning styles when they are implementing a process for the student to learn Classroom teachers in the twenty first century must have valid knowledge of how the brains of inner city school children work For students to master and comprehend math skills learning activities must be both fun and relevant to their present body of knowledge about life and living Multicultural Mathematics Claudia Zaslavsky,1993 58 activities to supplement and enrich the regular mathematics curriculum

middle school students The book also includes theoretical discussions of essential elements of oral storytelling multicultural education how oral storytelling can help children who have difficulty learning mathematics and mathematical problem solving This book significantly extends two pedagogical movements that have recently influenced mathematics teaching the use of physical manipulatives and visual imagery and the use of children's literature It takes a giant leap in leaving behind the written word for oral language and integrating serious mathematical explorations with fantasy Author Michael Stephen Schiro presents the teaching of mathematics often a high anxiety subject in a non threatening innovative fashion via the use of epic storytelling It is written in a conversational tone and includes numerous sample illustrations The book's presentation of stories how a teacher actually used them in class along with students responses and a discussion of the educational value of such strategies make this a comprehensive work that recognizes teachers capabilities and concerns about employing the best available educational practices The accompanying CD ROM contains the full text of two epic stories plus additional worksheets handouts and artwork This book will be of immediate interest to both pre service and in service teachers and all educators devoted to providing children powerful mathematical and literary experiences
