## **Magic Religion:**

Making Magic Randall Styers, 2004 Randall Styers seeks to account for the vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that. He argues that it can best be explained in light of the European and Euro American drive to establish and secure their own identity as normative **Magika Hiera** Christopher A. Faraone, Dirk Obbink, 1997 This collection challenges the tendency among scholars of ancient Greece to see magical and religious ritual as mutually exclusive and to ignore magical practices in Greek religion. The contributors survey specific bodies of archaeological epigraphical and papyrological evidence for magical practices in the Greek world and in each case determine whether the traditional dichotomy between magic and religion helps in any way to conceptualize the objective features of the evidence examined. Contributors include Christopher A. Faraone, J. H. M. Strubbe, H. S. Versnel, Roy Kotansky, John Scarborough, Samuel Eitrem, Fritz Graf, John J. Winkler, Hans Dieter Betz, and C. R. Phillips. Hawaiian Religion and Magic Scott Cunningham, 1994 This is the first book solely devoted to the spirituality of the Hawaiian people and how taboos, superstitions and magical practices permeated and defined every aspect of their lives. With a historical and sociological perspective it examines in detail their beliefs, the structure of their society, the names and ways of the deities, the practice of deifying ancestral spirits, the importance of dance, colors, water, stone and plants, and the concept of Mana, the spiritual power in all things. *Magic, Science and Religion and Other Essays* Bronislaw Malinowski, 2014-04-10 This vintage book comprises three famous Malinowski essays on the subject of religion. Malinowski is one of the most important and influential anthropologists of all time. He is particularly renowned for his ability to combine the reality of human experience with the cold calculations of science. An important collection of three of his most famous essays. *Magic, Science and Religion* provides its reader with a series of concepts concerning religion, magic, science, rite and myth. This is undertaken in an attempt to form a definite impression and understanding of the Trobrianders of New Guinea. The chapters of this book include: *Magic, Science and Religion*, *Primitive Man and his Religion*, *Rational Mastery by Man of his Surroundings*, *Faith and Cult*, *The Creative Acts of Religion*, *Providence in Primitive Life*, *Man's Selective Interest in Nature*, etcetera. This book is being republished now in an affordable modern edition complete with a specially commissioned new biography of the author. Religion, Science, and Magic Jacob Neusner, Ernest S. Frerichs, Paul Virgil McCracken Flesher, 1989 Every culture makes the distinction between true religion and magic regarding one action and its result as miraculous while rejecting another as the work of the devil. Surveying such topics as Babylonian witchcraft, Jesus the magician, magic in Hasidism and Kabbalah, and magic in Anglo-Saxon England, these ten essays provide a rigorous examination of the history of this distinction in Christianity and Judaism. Written by such distinguished scholars as Jacob Neusner, Hans Penner, Howard Kee, Tzvi Abusch, Susan R. Garrett, and Moshe Idel, the essays explore a broad range of topics including how certain social groups sort out approved practices and beliefs from those that are disapproved, providing fresh insight into how groups define themselves. Magic as an insider's term for the

outsider's religion and the tendency of religious traditions to exclude the magical. In addition the collection provides illuminating social cultural and anthropological explanations for the prominence of the magical in certain periods and literatures. **Religion as Magical Ideology** Konrad Talmont-Kaminski, 2014-10-20. Religion as Magical Ideology examines the relationship between rationality and supernatural beliefs arguing that such beliefs are products of evolution cognition and culture. The book does not offer a false rapprochement between reason and religion instead it explores their interrelationship as a series of complex adaptations between cognitive and cultural processes. Exploring the nature of the tension between religious traditions and reason Religion as Magical Ideology develops a dual inheritance theory of religion which combines the cognitive byproduct and prosocial adaptation accounts and analyses the connection between the function of a belief and the degree of protection it gets from potential counter evidence. With discussion ranging from individual cognitive mechanisms general functional considerations to the limits of evolutionary and cognitive processes the book offers readers a systematic account of how cognition shapes religious beliefs and practices.
