biological factors are not so important since linguistic experts are supposed to be dealing with the technical and mechanical factors of language acquisition e g how we learn the things what methodology or approaches we need to master the language properly etc Others note Clark 1997 that even when biological factors are very determining linguistics are obliged to stick to the main stream of language acquisition which is beyond any questions not a biological but a psychological factor However there are a lot more others who support biological factors and dealing with neurobiology deeply in contemporary writings These opinions all encouraged us to write an essay on biological factors emphasizing that biology and neurobiology are very important in Language Acquisition Furthermore in accordance with the new scientific findings and surveys we were really given the suggestion that there is a great need for dealing and utilizing neurobiology in the frame of linguistics **The**
