New Methods of Geostatistical Analysis and Graphical Presentation Roberto Bachi, 2007-07-27 From the Foreword The chief aim of this book is to present the reader with an integrated system of methods dealing with geographical statistics geostatistics and their applications It sums up developments based on the vast experience accumulated by Professor Bachi over several decades of research Interest in the quantitative locational aspects of geography and in the common ground of geography and statistics has grown rapidly involving an ever increasing spectrum of scientific disciplines the present volume will fill a genuine need as a textbook as a reference work and as a practical aid for geographers applied statisticians demographers ecologists regional planners economists professional staff of official statistical agencies and others E Peritz G Nathan N Kadmon

Mapping Israel, Mapping Palestine Jess Bier, 2017-06-30 Digital practices in social and political landscapes Why two researchers can look at the same feature and see different things Maps are widely believed to be objective and data rich computer made maps are iconic examples of digital knowledge It is often claimed that digital maps and rational boundaries can solve political conflict But in *Mapping Israel Mapping Palestine* Jess Bier challenges the view that digital maps are universal and value free She examines the ways that maps are made in Palestine and Israel to show how social and political landscapes shape the practice of science and technology How can two scientific cartographers look at the same geographic feature and see fundamentally different things In part Bier argues because knowledge about the Israeli military occupation is shaped by the occupation itself Ongoing injustices including checkpoints roadblocks and summary arrests mean that Palestinian and Israeli cartographers have different experiences of the landscape Palestinian forms of empirical knowledge including maps continue to be discounted Bier examines three representative cases of population governance and urban maps She analyzes Israeli population maps from 1967 to 1995 when Palestinian areas were left blank Palestinian state maps of the late 1990s and early 2000s which were influenced by Israeli raids on Palestinian offices and the legacy of British colonial maps and urban maps after the Second Intifada which show how segregated observers produce dramatically different maps of the same area The geographic production of knowledge including what and who are considered scientifically legitimate can change across space and time Bier argues that greater attention to these changes and to related issues of power will open up more heterogeneous ways of engaging with the world

Change of State Sandra Braman, 2009-08-28 How control over information creation processing flows and use has become the most effective form of power theoretical foundations and empirical examples of information policy in the U S an innovator informational state As the informational state replaces the bureaucratic welfare state control over information creation processing flows and use has become the most effective form of power In *Change of State* Sandra Braman examines the theoretical and practical ramifications of this change of state She looks at the ways in which governments are deliberate explicit and consistent in

their use of information policy to exercise power exploring not only such familiar topics as intellectual property rights and privacy but also areas in which policy is highly effective but little understood Such lesser known issues include hybrid citizenship the use of functionally equivalent borders internally to allow exceptions to U S law research funding census methods and network interconnection Trends in information policy argues Braman both manifest and trigger change in the nature of governance itself After laying the theoretical conceptual and historical foundations for understanding the informational state Braman examines 20 information policy principles found in the U S Constitution She then explores the effects of U S information policy on the identity structure borders and change processes of the state itself and on the individuals communities and organizations that make up the state Looking across the breadth of the legal system she presents current law as well as trends in and consequences of several information policy issues in each category affected Change of State introduces information policy on two levels coupling discussions of specific contemporary problems with more abstract analysis drawing on social theory and empirical research as well as law Most important the book provides a way of understanding how information policy brings about the fundamental social changes that come with the transformation to the informational state
