Enchantment and Exploitation William deBuys, 2015-11-15 First published in 1985 William deBuys's *Enchantment and Exploitation* has become a New Mexico classic. It offers a complete account of the relationship between society and environment in the Sangre de Cristo Mountains of northern New Mexico, a region unique in its rich combination of ecological and cultural diversity. Now more than thirty years later, this revised and expanded edition provides a long-awaited assessment of the quality of the journey that New Mexican society has traveled in that time and continues to travel. In a new final chapter, deBuys examines ongoing transformations in the mountains' natural systems, including most notably developments related to wildfires with significant implications for both the land and the people who depend on it. As the climate absorbs the effects of an industrial society, deBuys argues we can no longer expect the environmental future to be a reiteration of the environmental past.

Biochemistry Collections Bernard S. Schlessinger, 2019-12-05 This book, first published in 1982, offers an examination of the special nature of biochemistry collections. It focuses on the production, control, and use of the literature, diverse in nature and analysed here by specialist contributors.
