

Policy Analysis: An Analysis of National Education Policy 2020

Ziyi Chen*

University of Glasgow, United Kingdom

Abstract. This paper analyses the National Education Policy 2020 (pages. 1-32), the official policy document issued by the Ministry of Human Resource Development (India). This paper is written in light of five pedagogical theories: a). Human Capital; b). Traditional Academic; c). Learner Centred; d). Social Efficiency; e). Social Reconstruction. By identifying the presence of the five theories in the policy and analysing the dominant ideologies of education across the whole text, the paper aims to explore the influence of pedagogical philosophies and the relevant factors on educational policy formation and upgrading in India. It discovers that although all five theories exist in the policy, Learner Centred theory is the most dominant. In addition, it also discusses political and socio-economic factors that impact the formation of the Indian educational policy.

1 Introduction

This paper analyses the National Education Policy 2020 released by the Republic of India's Ministry of Human Resource Development. The policy (hereafter referred to as NEP) covers four parts of education: a). school education; b). higher education; c). critical areas of focus, such as adult education, promoting Indian languages and online education; d). the implementation of the policy. The complete analysis of NEP focuses on school education. It is based on five theories in pedagogy, including, in that order: the theories of Human Capital, Traditional Academic, Learner Centred, Social Efficiency, as well as Social Reconstruction. Next, this paper will discuss some theories dominating this policy. Finally, it will review various factors that contributed to NEP's existence.

2 Five theories of education

2.1 Human Capital

A way to think about education is through the lens of human capital, a concept that has its roots in the area of Economics. Human Capital theory in education is about investment and return. It claims that skills are a type of human capital that people develop via conscious investment in education and that these talents will eventually contribute to economic activity. At the same time, people's income in the labour market is regarded as a reward for their productivity (Schultz, 1961, quoted in Little, 2003). It is a fundamental principle of endogenous growth theory that human capital investments, innovation, and knowledge have a sizeable positive impact on economic growth, implicating policymaking's significant role in boosting the economy. Seeing people as only capital products seems

overly reductivism and leave out the meaning of being a human (Gillies, 2015).

2.2 Traditional Academic

Traditional Academic education, also known as Liberal education, has a rich history that can be traced back thousands of years, with valuable knowledge accumulated throughout human history and has been classified and organised into different academic disciplines. John Henry Newman (1996) states that liberal education is good for developing people's intellect but also makes people who have received a helpful education. Traditional education is a kind of education that equips students with the confidence to handle intricacy, variety, and change through learning curriculum. It aids students in developing a high level of social responsibility and powerful intellectual abilities and fostering their problem-solving capacity in practical situations (Robbins, 2014, quoted in Scott, 2014).

2.3 Learner Centred

Learner-centred education is an instructional paradigm that places learners at the centre of the teaching process (Mahendra et al., 2005). It can be interpreted as opposing the traditional academic concept of education. Instead of focusing on the disciplines, Learner Centred education emphasizes the needs and interests of children and individuals, requiring schools to create an inspiring and enjoyable environment for pupils to grow at their own pace. Despite the importance of learner-centred education in today's classrooms, some academics have criticised it for being overly general. For instance, Schweisfurth (2015) argues that phrases such as learner-centeredness and related words are frequently employed indiscriminately and encompass a wide range of ideas and behaviours to the point

New Mind For Policy Analysis:

A Complexity Theory for Public Policy Göktuğ Morçöl, 2013-05-02 Complexity theory has become popular in the natural and social sciences over the last few decades as a result of the advancements in our understanding of the complexities in natural and social phenomena. Concepts and methods of complexity theory have been applied by scholars of public affairs in North America and Europe but a comprehensive framework for these applications is lacking. A Complexity Theory for Public Policy proposes a conceptual synthesis and sets a foundation for future developments and applications. In this book G. ktu Morçöl convincingly makes the case that complexity theory can help us understand better the self-organizational, emergent and co-evolutionary characteristics of complex policy systems. In doing so, he discusses the epistemological implications of complexity theory and the methods complexity researchers use and those methods they could use. As the complexity studies spread more around the world in the coming decades, the contents of this book will become appealing to larger audiences, particularly to scholars and graduate students in public affairs. The unique combination of synthesis and explanation of concepts and methods found in this book will serve as reference frames for future works.

Reframing Public Policy Frank Fischer, 2003-06-20 In recent years a set of radical new approaches to public policy has been developing. These approaches, drawing on discursive analysis and participatory deliberative practices, have come to challenge the dominant technocratic empiricist models in policy analysis. In his major new book, Frank Fischer brings together this new work for the first time and critically examines it. In an accessible way, he describes the theoretical, methodological and political requirements and implications of the new post empiricist approach to public policy. The volume includes a discussion of the social construction of policy problems, the role of interpretation and narrative analysis in policy inquiry, the dialectics of policy argumentation and the uses of participatory policy analysis. The book will be required reading for anyone studying, researching or formulating public policy.

Handbook on Complexity and Public Policy Robert Geyer, Paul Cairney, 2015-05-29 Over recent years Complexity Science has revealed to us new limits to our possible knowledge and control in social, cultural and economic systems. Instead of supposing that past statistics and patterns will give us predictable outcomes for possible actions, we now know the world is and will always be creative and surprising. Continuous structural evolution within such systems may change the mechanisms, descriptors, problems and opportunities often negating policy aims. We therefore need to redevelop our thinking about interventions, policies and policy making, moving perhaps to a humbler, more learning approach. In this Handbook, leading thinkers in multiple domains set out these new ideas and allow us to understand how these new ideas are changing policymaking and policies in this new era.

Peter M. Allen, Cranfield University, UK
Handbook of Decision Making Goktug Morcol, 2006-11-01 Handbook of Decision Making includes the wisdom of the long theological and philosophical traditions of human society as well as a systematic exploration of the implications of contemporary evolutionary theories. Common patterns in decision making styles are identified as well as the

common variations that different contexts may generate. The text covers the multiplicity of mainstream decision making styles such as cost benefit analysis and linear programming. It also explains alternative and emerging methods such as geographic information systems Q methodology and narrative policy analysis. Practical applications are discussed using decision making practices in budgeting, public administration and governance, drug trafficking and information systems.

The Role of Public Administration in Alleviating Poverty and Improving Governance Jak Jabes, 2005. This publication is the first of a series from The Network of Asia Pacific Schools and Institutes of Public Administration and Governance NAPSIPAG a network of professionals formed to encourage the continuing development of public administration theory and practice through research and other initiatives and foster cooperation and collaboration between and among the members in pursuit of related and common interests.

A New Mind for Policy Analysis Goktug Morcol, 2002-12-30. Morcol argues that the objectivist and deterministic assumptions of mainstream policy analysis which are based on the Newtonian positivist worldview or mind set should be transcended. After demonstrating that the favored methods of mainstream policy analysis are based on Newtonian ontological and positivist epistemological assumptions and that the connections between these two are intimately and historically related he critically assesses and highlights the contributions of quantum mechanics, complexity theory and cognitive science to a new mind set in scientific knowledge. A post Newtonian and postpositivist mind set Newtonian positivist and post Newtonian postpositivist worldviews are conceptualized as fuzzy mind sets that is they are not mutually exclusive and that they share assumptions at varying degrees. Cognitive science shows that some of the fundamental concepts and assumptions of the Newtonian positivist philosophy such as the concept of causality and the tendency to categorize reality reductionist thinking are the products of the evolutionary adaptation of the human mind and they have become its built in defaults. As Morcol suggests we cannot change the biological defaults of our minds but we can change our way of thinking to an extent through a cultural evolution. He argues that conscious efforts can be made in policy analysis education to help move our thinking toward a post Newtonian and postpositivist policy analysis. Of particular interest to scholars and advanced students dealing with policy analysis, public administration and political science especially those concerned with epistemology and methodology.

Urban Political Analysis David R. Morgan, Samuel A. Kirkpatrick, 1972. Politics and Judgment in Federal District Courts C. K. Rowland, Robert A. Carp, 1996. A major empirical and theoretical work that has the potential for becoming a classic in the field. Sheldon Goldman author of The Federal Courts as a Political System This provocative theoretical approach should be of great interest to scholars and students of the federal bench. The Top Books of the Year New Mind For Policy Analysis The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have captivated audiences this year. The Must-Read : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. New Mind For Policy Analysis : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
