## **New Science Of Life:**

A New Science of Life Rupert Sheldrake, 2005-02-01 The fully revised edition of Rupert Sheldrake's controversial science classic from the author of the bestselling *Dogs That Know When Their Owners are Coming Home* celebrates its 40th anniversary in 2021. After chemists crystallised a new chemical for the first time it became easier and easier to crystallise in laboratories all over the world. After rats at Harvard first escaped from a new kind of water maze successive generations learned quicker and quicker. Then rats in Melbourne, Australia, learned yet faster. Rats with no trained ancestors shared in this improvement. Rupert Sheldrake sees these processes as examples of morphic resonance. Past forms and activities of organisms he argues influence organisms in the present through direct connections across time and space. Individual plants and animals both draw upon and contribute to the collective memory of their species. Sheldrake, now Director of the Perrott Warwick Project supported by Trinity College Cambridge, reinterprets the regularities of nature as being more like habits than immutable laws. Described as the best candidate for burning there has been for many years by Nature on first publication, this updated edition will raise hackles and inspire curiosity in equal measure.

**Science Set Free** Rupert Sheldrake, 2013-09-03 The bestselling author of *Dogs That Know When Their Owners Are Coming Home* offers an intriguing new assessment of modern day science that will radically change the way we view what is possible. In *Science Set Free*, originally published to acclaim in the UK as *The Science Delusion*, Dr Rupert Sheldrake, one of the world's most innovative scientists, shows the ways in which science is being constricted by assumptions that have over the years hardened into dogmas. Such dogmas are not only limiting but dangerous for the future of humanity. According to these principles, all of reality is material or physical; the world is a machine made up of inanimate matter; nature is purposeless; consciousness is nothing but the physical activity of the brain; free will is an illusion; God exists only as an idea in human minds imprisoned within our skulls. But should science be a belief system or a method of enquiry? Sheldrake shows that the materialist ideology is moribund; under its sway increasingly expensive research is reaping diminishing returns while societies around the world are paying the price. In the skeptical spirit of true science, Sheldrake turns the ten fundamental dogmas of materialism into exciting questions and shows how all of them open up startling new possibilities for discovery. *Science Set Free* will radically change your view of what is real and what is possible.

**Life as Energy** Alexis Mari Pietak, 2011 To many modern scientists a living thing is not significantly different from a lifeless object understood in terms of its basic parts: genes and molecules. Whereas science has given us many wonderful things, it has also taken away something essential: our ability to consider life seriously as a unique form of energy. Alexis Pietak, an exciting new scientific thinker, argues that the livingness of a life form is a very real kind of energy that we must recognize along with other kinds of energy such as heat and light. In this book, Dr Pietak builds an entirely new, holistic and rational science of life that could significantly enhance our understanding of individual life forms, ecological systems, and

even human sustainability on our planet This original and groundbreaking book highlights a crucial missing element in mainstream science
