New Tendencies In Art:

New Tendencies Armin Medosch, 2016-06-10 An account of a major international art movement originating in the former Yugoslavia in the 1960s which anticipated key aspects of information aesthetics New Tendencies a nonaligned modernist art movement emerged in the early 1960s in the former Yugoslavia a nonaligned country It represented a new sensibility rejecting both Abstract Expressionism and socialist realism in an attempt to formulate an art adequate to the age of advanced mass production In this book Armin Medosch examines the development of New Tendencies as a major international art movement in the context of social political and technological history Doing so he traces concurrent paradigm shifts the change from Fordism the political economy of mass production and consumption to the information society and the change from postwar modernism to dematerialized postmodern art practices Medosch explains that New Tendencies rather than opposing the forces of technology as most artists and intellectuals of the time did imagined the rapid advance of technology to be a springboard into a future beyond alienation and oppression Works by New Tendencies cast the viewer as coproducer abolishing the idea of artist as creative genius and replacing it with the notion of the visual researcher In 1968 and 1969 the group actively turned to the computer as a medium of visual research anticipating new media and digital art Medosch discusses modernization in then Yugoslavia and other nations on the periphery looks in detail at New Tendencies five major exhibitions in Zagreb the capital of Croatia and considers such topics as the group's relation to science the changing relationship of manual and intellectual labor New Tendencies in the international art market their engagement with computer art and the group's eventual eclipse by other new art practices including conceptualism land art and arte povera Numerous illustrations document New Tendencies works and exhibitions *New Tendencies in Art* Aldo Pellegrini, 1966 An art critic examines the products of artists and the movements in art from World War II to the present

Modernization Octavian Esanu, 2020-10-08 This book addresses the art historical category of contemporary art from a

transregional perspective but unlike other volumes of its kind it focuses in on non Western instantiations of the contemporary The book concerns itself with the historical conditions in which a radically new mode of artistic production distribution and consumption called contemporary art emerged in some countries of Eastern Europe the post Soviet republics of the USSR India Latin America and the Middle East following both local and broader sociopolitical processes of modernization and neoliberalization Its main argument is that one cannot fully engage with the idea of the global contemporary without also paying careful attention to the particular local and or national symptoms of the contemporary condition Part I is methodological and theoretical in scope while Part II is historical and documentary For the latter a number of case studies address the emergence of the category contemporary art in the context of Lebanon Egypt India Hungary Slovenia Croatia Bosnia and Herzegovina Armenia and Moldova The book will be of interest to scholars working in art history globalism cultural studies and postcolonial studies

With and Against Dominique Routhier, 2023-10-24 The little known story of the Situationist International's struggle against the automation of everyday life No other art movement has so profoundly influenced radical politics as the Situationist International But beyond the clichés about its purported leader Guy Debord the society of the spectacle and tournament and drive lies a more complex story about key historical shifts in the composition of capital work labor art and revolutionary theory during the 1950s and 60s *With and Against* reframes the history of the Situationist International as a struggle to come to terms with the then emerging ideologies of cybernetics and automation Through each of the book's four chapters Dominique Routhier dissects Situationist pamphlets documents artworks and objects that refract elements of a cybernetic hypothesis the theoretically hyperbolic belief that technological progress computers and automation make class struggle and the idea of revolution obsolete With equal attention to aesthetic detail and to the broader contours of political economy this book serves as a critical intervention in art history as well a call to reconsider more broadly the contemporary lessons of the most political of all artistic avantgardes

Mainframe Experimentalism Hannah Higgins, Douglas Kahn, 2023-09-01 *Mainframe Experimentalism* challenges the conventional wisdom that the digital arts arose out of Silicon Valley's technological revolutions in the 1970s In fact in the 1960s a diverse array of artists musicians poets writers and filmmakers around the world were engaging with mainframe and mini computers to create innovative new artworks that contradict the stereotypes of computer art Juxtaposing the original works alongside scholarly contributions by well established and emerging scholars from several disciplines *Mainframe Experimentalism* demonstrates that the radical and experimental aesthetics and political and cultural engagements of early digital art stand as precursors for the mobility among technological platforms artistic forms and social sites that has become commonplace today *Mainframe Experimentalism* challenges the conventional wisdom that the digital arts arose out of Silicon Valley's technological revolutions in the 1970s In fact in the 1960s a diverse array of artists musicians poets writers and filmmakers are
