## New Shop Floor Management:

**New Shop Floor Management** Kiyoshi Suzaki,1993-02-28 In this first comprehensive departure from the time and motion dictums of Frederick Taylor's Shop Management that have influenced management practices for most of this century Kiyoshi Suzaki offers a framework for successfully conducting business at its most crucial point the shop floor Drawing on the principles of holistic management where organizational boundaries are smashed and co destiny is created Suzaki demonstrates how modern shop floor management techniques focusing maximum energy on the front line can lead to dramatic improvements in productivity and valueadded to services The role of management today Suzaki argues is to eliminate its own responsibilities by thinking of the organization from the genba or shop floor point of view In this challenge Suzaki claims organizations need to collect the wisdom of people by practicing Glass Wall Management where organizations become transparent enabling employees to contribute maximum creativity as opposed to blocking their potential with what he calls Brick Wall Management Further to empower individuals to selfmanage their work and satisfy their customers Suzaki asserts that they all should learn to manage their own mini company where everybody is considered president of his or her area of responsibility Front line supervisors Suzaki shows must develop a mission and goals and share them both up and downstream He cites examples of the shop floor point of view McDonald's Corporation's legal staff learning how to sell hamburgers and fix milkshake machines Honda's human resource staff training on the assembly line that narrow the gap between top management and the shop floor By upgrading people's skills focusing on empowerment and streamlining processes Suzaki illustrates that an organization will realize concrete improvements in quality cost delivery safety morale and ultimately its competitive position

*The New Shop Floor Management* Kiyoshi Suzaki,1993 Kiyoshi Suzaki offers a framework for successfully conducting business at its most crucial point the shop floor Drawing on the principles of holistic management where organizational boundaries are smashed and co destiny is created Suzaki demonstrates how modern shop floor management techniques focusing maximum energy on the front line can lead to dramatic improvements in productivity and valueadded to services To empower individuals to selfmanage their work and satisfy their customers Suzaki asserts that they all should learn to manage their own mini company where everybody is considered president of his or her area of responsibility Front line supervisors Suzaki shows must develop a mission and goals and share them both up and downstream He cites examples of the shop floor point of view McDonald's Corporation's legal staff learning how to sell hamburgers and fix milkshake machines Honda's human resource staff training on the assembly line that narrow the gap between top management and the shop floor By upgrading people's skills focusing on empowerment and streamlining processes Suzaki illustrates that an organization will realize concrete improvements in quality cost delivery safety morale and ultimately its competitive position Publisher's description Fundamentals of Daily Shop Floor Management Philip J. Gisi,2023-02-17 Survival and thriving in today's business environment require companies to continuously strive for operational excellence at

all levels of the organization. Simply working to maintain existing operations is not an adequate or sustainable business strategy especially when competing in a global market. To remain relevant companies must adopt a process control and continuous improvement mentality as an integral part of their daily work activities. These two operational disciplines form the foundation and stepping stones for manufacturing excellence. Processes must be stable, capable and controlled as a prerequisite for sustainable improvement. Sustainable improvements must be strategic, continuous and focused on process optimization. Modern day manufacturing is rapidly changing in the face of technological, geopolitical, social and environmental developments. These challenges are altering the way we think and act to transform raw materials into finished goods. Meeting these challenges requires particular attention to how we develop and engage people and apply technology for long term sustainability and competitive advantage. This book takes you on a journey to explore the fundamental elements, management practices, improvement methods and future direction of shop floor management. Part 1 of this five part book considers workplace culture, organizational structure, operational discipline and employee accountability as the foundation for a robust manufacturing system. Part 2 studies the impact of process standardization, data analytics, information sharing, communication and people on daily shop floor management. Once the management system has been adequately described, Part 3 concentrates on its effective execution, monitoring and control with a deep look into the people, methods, machines, materials and environment that make it possible. Like every good manufacturing text, efficiency and productivity are key topics. That's why Part 4 explores various methods, tools and techniques associated with product and process development, productivity improvement, agile methods, shop floor optimization and manufacturing excellence. The final section, Part 5, shifts focus to emerging technologies, engaging the reader to contemplate technology's impact on the digital transformation of the manufacturing industry.
