Psychology In Modules (Spiral) David G. Myers,2009-09-28 Why Myers David Myers has become the world s best selling introductory psychology author by serving the needs of instructors and students so well Each Myers textbook offers an impeccable combination of up to date research well crafted pedagogy and effective media and supplements Most of all each Myers text demonstrates why this author s style works so well for students with his signature compassionate companionable voice and superb judgment about how to communicate the science of psychology and its human impact Why Modules This modules based version of Myers best selling

full length text Psychology breaking down that book's 16 chapters into 59 short modules is yet another example of the author's ability to understand what works in the classroom. It comes from Myers' experiences with students who strongly prefer textbooks divided into briefer segments instead of lengthier chapters and with instructors who appreciate the flexibility offered by the modular format. Modular organization presents material in smaller segments. Students can easily read any module in a single sitting. Self-standing modules. Instructors can assign modules in their own preferred order. The modules make no assumptions about what students have previously read. Illustrations and key terms are repeated as needed. This modular organization of short stand-alone text units enhances teacher flexibility. Instead of assigning the entire Sensation and Perception chapter, instructors can assign the module on vision, the module on hearing, and/or the module on the other senses, in whatever order they choose. Mathematical Reviews, 2004 *English Mechanic and World of Science*, 1924 **Jaromír Funke** Antonín Dufek, 2013 Jaromír Funke (1896–1945) was an innovator of modern photography just like Jaroslav Rássler, Man Ray, László Moholy-Nagy, Albert Renger-Patzsch, Aleksander Rodchenko, Paul Strand, and Edward Weston, to name but a few. Like them, Funke set out in 1922 on the road towards abstraction, which would eventually lead him to his own particularism: photogenism. Funke also responded to Cubism and created exemplary works of the New Objectivity and Constructivism, but he stood closest to Bauhaus. During the 1920s he was one of the first to adopt irrational approaches such as Poetism and Surrealism. In the second half of the 1930s Funke established his emotional photography on the basis of Breton's notion of the magic encounter. He was a typical, universally educated intellectual of his era. This book focuses primarily on the ideas that shaped and transformed Funke's work while placing it within the context of European avant-garde photography and culture of which he was a pioneer.
