varied substantially and that it has influenced the development of each nation's political and social institutions. The book begins with an assessment of the ethics of the West in contrast with the East. This vanguard collection of original and in-depth essays explores the intricate interplay of the aesthetic and psychological domains during the late nineteenth and early twentieth centuries and considers the reasons why a common Modernist project took shape when and in the circumstances that it did. These changes occurred precisely when the distinctively modern disciplines of psychology, psychiatry, and psychoanalysis established their scientific foundations and achieved the forms in which we largely know them today. This volume examines the dense web of connections joining the aesthetic and psychological realms in the modern era, charting historically the emergence of the ongoing modern discussion surrounding such issues as identity formation, sexuality, and the unconscious. The contributors form a distinguished and diversified group of scholars who write about a wide range of cultural fields including philosophy, the novel, and poetry, drama, dance, film, and photography, as well as medicine, psychology, and the occult sciences.
