

New Media: What You Need To Know – The Basics

New Media Basics

Kristina Engstrom

New Media Basics:

Basic Knowledge of University Teaching Andreas Osterroth, 2025-04-15 The book shows concisely and clearly how to plan conduct and evaluate university courses. It is suitable for beginners without any pedagogical or didactic training but also for experienced instructors who want to enrich their teaching with new ideas. Teaching is a challenging task as most lecturers are excellently trained in their subject area but have never learned how to convey complex content as efficiently as possible. In addition to the fundamental didactics that should underpin a course practical methods are also described along with explanations on how to conduct evaluations meaningfully and profitably

Encyclopedia of Journalism Christopher H. Sterling, 2009-09-23 Written in a clear and accessible style that would suit the needs of journalists and scholars alike this encyclopedia is highly recommended for large news organizations and all schools of journalism. Starred Review Library Journal. Journalism permeates our lives and shapes our thoughts in ways we've long taken for granted. Whether we listen to National Public Radio in the morning, view the lead story on the Today show, read the morning newspaper, headlines stay up to the minute with Internet news, browse grocery store tabloids, receive Time magazine in our mailbox, or watch the nightly news on television, journalism pervades our daily activities. The six volume Encyclopedia of Journalism covers all significant dimensions of journalism, including print, broadcast and Internet journalism, U.S. and international perspectives, history, technology, legal issues and court cases, ownership and economics. The set contains more than 350 signed entries under the direction of leading journalism scholar Christopher H. Sterling of The George Washington University. In the A to Z volumes 1 through 4, both scholars and journalists contribute articles that span the field's wide spectrum of topics, from design, editing, advertising and marketing to libel, censorship, First Amendment rights and bias to digital manipulation, media hoaxes, political cartoonists and secrecy and leaks. Also covered are recently emerging media such as podcasting, blogs and chat rooms. The last two volumes contain a thorough listing of journalism awards and prizes, a lengthy section on journalism freedom around the world, an annotated bibliography and key documents. The latter, edited by Glenn Lewis of CUNY Graduate School of Journalism and York College, CUNY, comprises dozens of primary documents involving codes of ethics, media and the law, and future changes in store for journalism education. Key Themes: Consumers and Audiences, Criticism and Education, Economics, Ethnic and Minority Journalism, Issues and Controversies, Journalist Organizations, Journalists, Law and Policy, Magazine Types, Motion Pictures, Networks, News Agencies and Services, News Categories, News Media, U.S. News Media, World Newspaper Types, News Program Types, Online Journalism, Political Communications, Processes and Routines of Journalism, Radio and Television Technology.

Freeing the Presses Timothy E. Cook, 2006-08-01 Most Americans consider a free press essential to democratic society either as an independent watchdog against governmental abuse of power or as a wide open marketplace of ideas. But few understand that far-reaching public policies have shaped the news citizens receive. In an age when mass communication ranges from independent cable channels to the Internet, it is essential to assess these policies and

their effects if we want the media to continue fulfilling their role Freeing the Presses offers a pathbreaking inquiry into the theory and practice of freedom of the press at a critical time in the growing overlap between modern media and political discussion Six political communication scholars draw upon history sociology political science legal philosophy and journalism to investigate whether the freedoms and privileges given to the news media and to reporters actually produce the results we expect Their discussion covers past present and future media performance and engages a wide range of provocative questions

Democracy and the News Herbert J. Gans,2004 American democracy was founded on the belief that ultimate power rests in an informed citizenry But that belief appears naive in an era when private corporations manipulate public policy and the individual citizen is dwarfed by agencies special interest groups and other organizations that have a firm grasp on real political and economic power In Democracy and the News one of America s most astute social critics explores the crucial link between a weakened news media and weakened democracy Building on his 1979 classic media critique Deciding What s News Herbert Gans shows how with the advent of cable news networks the internet and a proliferation of other sources the role of contemporary journalists has shrunk as the audience for news moves away from major print and electronic media to smaller and smaller outlets Gans argues that journalism also suffers from assembly line modes of production with the major product being publicity for the president and other top political officials the very people citizens most distrust In such an environment investigative journalism which could offer citizens the information they need to make intelligent critical choices on a range of difficult issues cannot flourish But Gans offers incisive suggestions about what the news media can do to recapture its role in American society and what political and economic changes might move us closer to a true citizen s democracy Touching on questions of critical national importance Democracy and the News sheds new light on the vital importance of a healthy news media for a healthy democracy

Mission Improbable Helen Fogarassy,1999-01-01 Helen Fogarassy editor in chief of the UNOSOM Weekly Review in Somalia during the 1994 crisis describes the overwhelmingly positive effect of multinational intervention in the wartorn country Based on her first hand observations Fogarassy argues forcefully in defense of such humanitarian ventures while simultaneously decrying the oversimplification of the Somalian situation by the world media She demonstrates how our widespread perception that humanitarian missions in developing countries are doomed to failure is directly related to the images of dead American soldiers being dragged through the streets of Mogadishu While this picture proves undeniably horrific success appeared with improved health and educational situations in addition to a stabilized society with a developing infrastructure and a workable government Fogarassy s provocative book is sure to make historians political scientists and policy makers reexamine the need for humanitarian intervention in other desperate countries

Communication and Technology Lorenzo Cantoni,James A. Danowski,2015-08-31 The primary goal of the Communication and Technology volume 5th within the series Handbooks of Communication Science is to provide the reader with a comprehensive compilation of key scholarly literature

identifying theoretical issues emerging concepts current research specialized methods and directions for future investigations The internet and web have become the backbone of many new communication technologies often transforming older communication media through digitization to make them compatible with the net Accordingly this volume focuses on internet web technologies The essays cover various infrastructure technologies ranging from different kinds of hard wired elements to a range of wireless technologies such as WiFi mobile telephony and satellite technologies Audio visual communication is discussed with reference to large format motion pictures medium sized television and video formats and the small screen mobile smartphone There is also coverage of audio only media such as radio music and voice telephony text media in such venues as online newspapers blogs discussion forums and mobile texting and multi media technologies such as games and virtual reality

Standard Directory of Advertisers, 1987 **If It Was Not For Terrorism** Banu Baybars Hawks, Lemi Baruh, 2011-07-12 If It Was Not for Terrorism Crisis Compromise and Elite Discourse in the Age of War on Terror aims to investigate questions regarding the hegemonic power that is exercised by elites and mass media through the discourse of War on Terror The chapters in the volume provide case studies from a wide variety of geographies to debate questions regarding the construction of the meaning of terrorism communication of collective identities and otherness and media frames regarding the War on Terror civil liberties and government restrictions In bringing this collection together it was the editors intention to provide a venue for discussion of expressions and diverse concerns around the themes of media and terrorism from international and interdisciplinary perspectives The edited volume is divided into two parts The first part focuses on elite discourse about the definition of terrorism and discursive strategies involved in construction of us vs others The second part of the volume investigates issues related to media framing of the compromises that are deemed necessary for success in the War on Terror At the same time several chapters of this part also identify opportunities for resistance to hegemonic discourse
