Moon Rush Leonard David, 2019-05-07 Veteran space journalist digs into the science and technology past present and future central to our explorations of Earth's only satellite the space destination most hotly pursued today In these rich pages veteran science journalist Leonard David explores the moon in all its facets from ancient myth to future Moon Village plans Illustrating his text with maps graphics and photographs David offers inside information about how the United States allies and competitors as well as key private corporations like Moon Express and Jeff Bezos's Blue Origin plan to reach inhabit and even harvest the moon in the decades to come Spurred on by the Google Lunar XPRIZE 20 million for the first to get to the moon and send images home the 21st century space race back to the moon has become more urgent and more timely than ever Accounts of these new strategies are set against past efforts including stories never before told about the Apollo missions and Cold War plans for military surveillance and missile launches from the moon Timely and fascinating this book sheds new light on our constant lunar companion offering reasons to gaze up and see it in a different way than ever before

New Space Frontiers Piers Bizony, 2014-10-15 Take a journey into the New Space Frontier It is easy to imagine that the space shuttle's retirement has edged the Space Age toward closure at least in terms of human flight beyond the bounds of earth In fact there are more people carrying ships being constructed now than at any time since Yuri Gagarin became the first man in space half a century ago Some are already servicing the International Space Station which incidentally has ensured a permanent human presence in space for the last two decades and is set to continue and expand for decades yet to come What's more NASA is no longer the only big player in the space game Commercial non governmental space exploration is becoming a reality rather than just a pipe dream What orbital adventures await us in the next five decades Will humans ever again head into deep space as the Apollo astronauts once did NASA's new hardware is aimed toward asteroid missions and ultimately Mars but there is a significant chance that a government funded space agency will not be the only or even the first organization to send humans across the solar system Get ready to experience the excitement of adventure with New Space Frontier Through gorgeous photography and engaging writing noted space and science author Piers Bizony speculates beyond just today's hardware and explores what might be possible for the next generation
