Lourdasamy, 2004 This book gives a flavour of the Indian response to modern science by analysing the lives and careers of four scientifically influential personalities in Bengal His analysis of the careers of two scientists J C Bose and P C Ray and two institution builders Mahendralal Sircar and Asutosh Mookerjee brings to light the issues related to science at a time of colonialism and nationalism Scientists often had to depend on British institutions for legitimation and funding while also supporting the nationalist cause for greater autonomy One of the central claims of this book is that the protagonists aimed to contribute to a modern world science one based on a strong sense of universalism They did not aim to construct any alternative sciences though they did express and apply their work by drawing on their cultural heritage This makes Science and National Consciousness a work of particular relevance today when a homogenous instrumentalist and totally Western conception of science is being globally accepted New Perspectives in Nigerian Education E. Conduct of American Foreign Policy David Gray Adler,Larry Nelson George,1996 In this provocative and readable volume eleven leading constitutional authorities challenge business as usual in American foreign policymaking For far too long they contend Americans have acquiesced to presidential claims to sweeping executive powers in foreign affairs thanks to imperial minded presidents a weak willed Congress and neglectful scholars These authors forcefully argue that the president is not the supreme crafter of foreign policy and that Congress must provide more than a rubber stamp for the president s agenda Unilateral presidential control of foreign relations they warn can pose a grave threat to our nation s welfare and is simply without constitutional warrant Combining constitutional theory with keen historical insights these authors illuminate the roots of presidential abuse of executive power and remind us of the past and potential costs of such disregard for our unique system of checks and balances An essential guide for all concerned citizens and members of Congress this volume should help revive a proper understanding of this crucial dimension of American democracy *Indian-made* Erika Marie

Bsumek,2008 In works of silver and wool the Navajos have established a unique brand of American craft And when their artisans were integrated into the American economy during the late nineteenth century they became part of a complex cultural and economic framework in which their handmade crafts conveyed meanings beyond simple adornment Bsumek unravels the layers of meaning that surround the branding of Indian made When Navajo artisans produced their goods collaborating traders tourist industry personnel and even ethnologists created a vision of Navajo culture that had little to do with Navajos themselves And as Anglos consumed Navajo crafts they also consumed the romantic notion of Navajos as primitives perpetuated by the marketplace These processes of production and consumption reinforced each other creating a symbiotic relationship and influencing both mutual Anglo Navajo perceptions and the ways in which Navajos participated in the modern marketplace Ultimately Bsumek shows that the sale of Indian made goods cannot be explained solely through supply and demand It must also reckon with the multiple images and narratives that grew up around the goods themselves integrating consumer culture tourism and history to open new perspectives on our understanding of American Indian material culture BOOK JACKET The CIA & Congress David M.
