New Product Development:

New Product Development Scott J. Edgett, Rachel Brill, 2011 **Lean, Rapid and Profitable New Product Development** Robert G. Cooper, Scott J. Edgett, 2009-03-06 Although many companies have introduced product innovation processes they are still struggling to achieve the financial results they expected. This book shows how to properly balance the need for speed with the drive for profitability. It demonstrates how to maximize the value of a new product portfolio, how to streamline the product innovation process and how to achieve growth that is both profitable and sustainable. New product success is not simply about developing new products that sell; it's about getting them to market quickly with the lowest cost and the highest return. Dr. Robert G. Cooper and Dr. Scott J. Edgett use their latest research and draw upon their combined 60 years of experience in the field to show you what the companies that continuously win at new products are doing. Top performers have discovered how to properly balance the need for speed with profitability. With a new process they call NexGen™ Stage Gate R. Dr. Cooper and Dr. Edgett show precisely how you can ensure that your innovation is not only lean and rapid but profitable as well. For more information visit www.stagegate.com

NEW PRODUCT DEVELOPMENT-A FMCG PERSPECTIVE Dr. K. Rajeshwari, 2017-07-17 New Product Development FMCG Perspective is the first of its kind in the Indian context. It helps students, academicians, and corporate personnel alike in developing and launching new products in the marketplace. The following aspects are covered: How does one develop new products? What are the methods to measure the success of new products? How is developing new products in an entrepreneurial company different? What are the key factors that contribute to the success of new products in the marketplace? The author's fifteen years of experience in the FMCG industry have contributed to the content for this book.

Revolutionizing Product Development Steven C. Wheelwright, Kim B. Clark, 1992-06-15

Today a company's capability to conceive and design quality prototypes and bring a variety of superior products to market quicker than its competitors is increasingly the focal point of competition contend leading product development experts Steven Wheelwright and Kim Clark Drawing on six years of in depth systematic worldwide research they present proven principles for developing the critical capabilities for speed efficiency and quality that have worked again and again in scores of successful Japanese American and European fast cycle firms The authors argue that to survive let alone succeed today's companies must construct a new platform with new methodologies on which they can compete Using their model for development strategies Wheelwright and Clark show that firms can create a solid architecture for the integration of marketing manufacturing and design functions for problem solving and fast action particularly during the critical design

build test cycles of prototype creation. They demonstrate further how successful firms such as Honda in automobiles, Compaq in personal computers, Applied Materials in semi-conductors, Sony in audio equipment, The Limited in apparel, and Hill Rom in hospital beds have employed recent methodologies to bring new products to market at break-neck speed. Such innovations include design for manufacturability, quality function deployment, computer-aided design, and computer-aided engineering. Finally, Wheelwright and Clark emphasize the importance of learning in the organization. Companies that consistently design it right the first time and follow a path of continuous improvement in product and process development have a formidable edge in the crucial race to market. Theory of New Product Development and Its Applications Esen Gurbuz, 2018. A product which can be a physical object or a service should be functional and emotional to satisfy the customer's need and to offer value be delivered as the way customer demanded. Also it has to include other specific elements like providing customer services. New product is the result of a creative and unique idea that is able to make consumers satisfied. In the process of new product development it should not be thought that the change will only be on product physically but also on every aspect of the product. The difference between ideas increases production of different goods. The different kind of goods can positively affect the customers opinion about a business. When a new business starts to produce a product which satisfies customer's need then the demand of competitor's product which was already in the market may be decreased. Establishment of new product development NPD departments and their direct influence in the production process is crucial for businesses. They can determine demand and needs of consumers by applying different theories. These theories can be classified as i product service systems ii the Kano model iii conjoint analysis iv the product value matrix and v quality function deployment.
