Intelligence Support Systems Paul Hoffmann, Kornel Terplan, 2005-07-27 Telecommunications service providers face increasing information assistance requests to help law enforcement while they simultaneously struggle with CapEx and OpEx reductions On the other hand law enforcement agencies face expensive telecommunication interface options for data collection as they battle with a growing backlog of subpoena requests

Software Business Pasi Tyrväinen, Slinger Jansen, Michael A. Cusumano, 2010-06-18 The advancement of the software industry has had a substantial impact not only on productivity and on GDP growth globally but also on our daily work and life Software business refers to commercial activity of the software industry aimed at generating income from delivery of software products and software services Although software business shares common features with other international

knowledge intensive businesses it carries many inherent features making it an intriguing and challenging domain for research. Until now however software business has received little attention from the academic community. The First International Conference on Software Business ICSOB 2010 was organized in Jyvaskyla during June 21-23 2010. This inaugural conference brought together a strong Program Committee of 52 members with research disciplines from various fields of business management and technology management as well as international authors with members coming from 17 countries from South and North America to Europe India and Australia. We received 35 research paper submissions. The papers went through a double blind review process producing at least three reviews for each accepted paper. The Program Committee accepted 13 submissions to be presented as full papers in the conference equaling 37% of the submissions. In addition ten papers were accepted as short papers. The accepted papers represent the wide variety of search activity on software business. For the purposes of the conference program the papers were organized under eight themes: business models, business management ecosystems, education and research, internationalization, open source software and social media, product management and software as a service. In addition to the paper sessions the conference program included three keynote presentations and a Business Innovation Track containing best practice presentations from the software industry. The conference program also included two workshops, three tutorials and an adjunct meeting of the Cloud Software Consortia.

Successful Service Design for Telecommunications Sauming Pang, 2009-01-21. Comprehensive reference to successful service design for the telecommunications industry. Telecommunications companies operate in increasingly competitive environments. The companies that survive and excel are those offering the most compelling range of products and services. These services are complex since they touch all aspects of business. Service design and implementation skills are therefore the key for staying on top of the competition. *Successful Service Design for Telecommunications* provides a comprehensive guide into service design and implementation. The author provides a consistent approach to designing scalable and operable processes that can be used when designing a variety of technologically based services offering concepts, principles and numerous examples that the readers can easily adapt to their technological environment. Key features: Defines what telecommunications services are from business, technical and operational perspectives. Explains how telecommunications services can be implemented including implementation strategies for both new service introductions and enhancements to existing services. The principles and management processes described can be used on all telecommunications services: fixed, mobile, broadband and wireless and technology e.g. IT and Internet based services. Includes references to the current best practices and industry standards and complements the eTom and the OSS/BSS models proposed by the TeleManagement Forum. Features numerous real life scenarios and examples to support the discussion on the key concepts of service design. This book will be of interest to managers, service designers, project managers, IT professionals, operation managers and senior executives who work in the telecommunications sector. University students

studying telecommunications IT and service science courses will also find this text insightful
