Other Hand:

The Power of Your Other Hand Lucia Capacchione, 2019 Brain researchers have in recent years have discovered the vast untapped potential of the brain's little used right hemisphere. Art therapist Lucia Capacchione discovered that our nondominant hand is a direct channel to that potential. Her research and fieldwork with people using their other hand provides the raw material for this classic first published in 1988. In workshops and private sessions Lucia has worked with thousands of people employing these techniques to help them become more creative, expressive and intuitive in their day to day lives and also experience improved health and greater fulfillment in their relationships. Lucia will show you how to Channel the deep inner wisdom of your True Self. Change negative attitudes about yourself. Unlock creativity. Uncover hidden artistic abilities. Heal your relationships. Through various drawing and writing exercises Lucia Capacchione hopes you will discover the power that lies hidden in your other hand. The techniques will help you explore and understand your thoughts and feelings on a completely different level and reconnect with a sense of playfulness you may have left behind in childhood.

English for Academic Research: Vocabulary Exercises Adrian Wallwork, 2012-09-19 This book is based on a study of referees' reports and letters from journal editors on reasons why papers written by non-native researchers are rejected due to problems with English: long sentences, redundancy, poor structure, etc. It draws on English-related errors from around 5000 papers written by non-native authors, around 3000 emails, 500 abstracts by PhD students and over 1000 hours of teaching researchers how to write and present research papers. The exercises are organized into nine chapters on adjectives and adverbs (e.g. actual vs. current, different vs. several, continually vs. continuously), link words (e.g. on the contrary vs. on the other hand, despite vs. nevertheless), nouns (e.g. danger vs. hazard, measure vs. measurement), prepositions (e.g. among vs. between, in vs. into, with vs. within), verbs (e.g. check vs. control, compose vs. comprise, arise vs. raise, exclude vs. rule out), false friends and synonyms, spelling, useful phrases, emails. Nearly all exercises require no actual writing but simply choosing between various options, thus facilitating self-study (e.g. reading and rapid progress). The exercises can also be integrated into English for Academic Purposes (EAP) and English for Special Purposes (ESP) courses at universities and research institutes. The book can be used in conjunction with the other exercise books in the series English for Academic Research Writing Exercises, English for Academic Research Grammar Exercises.
