Purkitt, Stephen F. Burgess, 2005-05-11 South Africa's Weapons of Mass Destruction offers an in depth view of the secret development and voluntary disarmament of South Africa's nuclear biological and chemical weapons program Project Coast Helen E Purkitt and Stephen F Burgess explore how systems used for nuclear biological and chemical weapons in South Africa were acquired and established beyond the gaze of international and domestic political actors On the basis of archival evidence from Project Coast and their own extensive interviews with military and political officials Purkitt and Burgess consider what motivates countries to acquire and build such powerful weaponry and examine when and how decisions are made to dismantle a military arsenal voluntarily Questions such as how to destroy weapons safely and keep them from reappearing on international markets are considered along with comparative strategies for successful disarmament in other nation states
