The Experience of Atheism: Phenomenology, Metaphysics and Religion Claude Romano, Robyn Horner, 2021-05-06

Religious and atheistic belief are presented anew in a volume of essays from leading phenomenologists in both France and the UK Atheism often presented as the negation of religious belief is here engaged with from a phenomenologically informed notion of experience The focus on experience sparks new debates in readings of belief faith and atheism as they relate to and complicate each other What unites the contributors is their relationship to phenomenology as it has developed in France in the wake of Heidegger and Husserl Leading French intellectuals from this context Jean Luc Nancy Quentin Meillassoux and Catherine Malabou amongst others contribute arresting ideas on atheistic faith the death of God and anarchic faith opening up new areas of understanding in a field whose parameters and core concepts are ever shifting Revealing the extent to which religious and atheistic belief must be seen to influence and on a fundamental level to co create one another the pluralistic society in which religious belief is counted as one option amongst many is given primacy The fact that religious faith has become not only optional but also in many contexts strangely alienated from society deeply modifies the experience of the believer as much as that of the non believer A focus on experience over and above belief moves us towards a mode of experiential knowledge which refuses to privilege the atheistic believer and deride the reality of religious belief

The Mariner's Mirror Leonard George Carr Laughton, Roger Charles Anderson, William Gordon Perrin, 1923 **The ^AAI**

Mirror Shannon Vallor, 2024-05-06 For many AI technology inspires hope for the future the promise of shared human flourishing and collective liberation from drudgery that defines the good life but always seems to elude our species Yet today's AI technology is forged from human generated data into immensely powerful but flawed mirrors that endlessly reflect the same errors biases and failures of wisdom we are striving to escape To open new futures for ourselves with these tools is as misguided as gazing into a mirror while trying to climb an uncharted mountain At this crucial juncture for humanity and our planet we need something new from AI and more importantly from ourselves We need to find new hope not to surrender our greatest moral and intellectual ambitions to machines that have none but to renew those ambitions collectively for ourselves Shannon Vallor makes a wide ranging prophetic and philosophical case for what AI could be and what we can be with it She calls us to reclaim our human potential for moral and intellectual growth rather than losing sight of our shared humanity as we gaze dully into our AI mirrors

Orlov,2011-12-01 Dark Mirrors is a wide ranging study of two central figures in early Jewish demonology the fallen angels Azazel and Satanael Andrei A Orlov explores the mediating role of these paradigmatic celestial rebels in the development of Jewish demonological traditions from Second Temple apocalypticism to later Jewish mysticism such as that of the Hekhalot and Shi ur Qomah materials Throughout Orlov makes use of Jewish pseudepigraphical materials in Slavonic that are not widely known Orlov traces the origins of Azazel and Satanael to different and competing mythologies of evil one to the Fall in the Garden of Eden the other to the revolt of angels in the antediluvian period Although Azazel and Satanael are initially representatives of rival etiologies of corruption in later Jewish and Christian demonological lore each is able to enter the other's stories in new conceptual capacities Dark Mirrors also examines the symmetrical patterns of early Jewish demonology that are often manifested in these fallen angels imitation of the attributes of various heavenly beings including principal angels and even God himself
