**Competition Among the Few** William Fellner,1960      **Miscalculations of Monopoly and Oligopoly Welfare Losses with Linear Demand** Jolian P. McHardy,University of Hull. Department of Economics and Commerce,2000      **Monopoly and Oligopoly by Merger** George Joseph Stigler,1950      *The Theory of Monopolistic Competition* Edward Chamberlin,1962 Chamberlain s classic work now in its eighth edition continues to influence the fundamental thinking of economists and businessmen and for the best of reasons It is a basic treatise in theory which unlike traditional theories of perfect competition deals with the economic world we live in including both price and nonprice competition oligopoly various degrees of monopoly differentiated products advertising etc Its influence has spread extensively as well as intensively to new theoretical problems such as economic dynamics and development and to the analysis of an increasingly wide range of the so called applied fields In this eighth edition of *The Theory of Monopolistic Competition* Professor Chamberlain has added three new appendices *The Definition of Selling Costs Numbers and Elasticities* and *The Origin and Early Development of Monopolistic Competition Theory* The index has been extensively revised and expanded In successive earlier editions the author compiled a bibliography of 1497 items He also added a new treatment of the cost curve of the firm discussing in particular some current misconceptions as to the role of the laws of proportions and of the divisibility of factors in relation to economics and diseconomies of scale and advancing a broader theory which assigns to both proportions and scale their proper roles      Miscalculations of Monopoly and Oliopoly...
