Models For Divine Activity:

Models for Divine Activity Ian T. Ramsey, 2011-06-07 This last book by the Bishop of Durham is the text of the Zenos Lectures that he gave in Chicago in 1966. In them Dr Ramsey applied his well known approach of models and disclosure situations to the doctrine of the Holy Spirit. The first lecture considers the origin and use of the model of wind/breath/air from which the Spirit is named. Subsequent lectures consider the models of economy and presence. In the discussion a number of important issues are touched on: the personality of the Holy Spirit, the ubiquity of God and the relationship of prayer to the presence of God. The final lecture goes on to counter criticisms that have been made of Dr Ramsey's theology. Are models and disclosures not a substitute for God? Is not this approach virtually atheistic with perhaps not much virtual about it? Because Dr Ramsey's writings have appeared in a great many books and journals it has also been thought fitting to include a comprehensive bibliography and this book ends with a complete list of all his published works.

Eat the Bible Micah E. Chung, 2024-07-19 People love their metaphors for the Bible. The Bible is a sword, a mirror, a script, a score, a cathedral, a rule book, a user's manual, a lamp, a love letter. But how did metaphor, which in the eighteenth century was seen as a deceptive rhetorical trick, become such a prominent tool for speaking of Scripture? And how does one judge between a good metaphor and a bad one? This book explores the theological use of metaphor to describe the nature and interpretation of Scripture. It interrogates three such models: the Bible as musical score, Anthony Thiselton's the Bible as theo-dramatic script, Kevin Vanhoozer's the Bible as light, John Feinberg seeking to evaluate their faithfulness to Scripture and church tradition, their fittingness to the current culture, and their fruitfulness for understanding and practicing the biblical text. The author then proposes and explores what he considers a better model, one drawn from the Bible itself, namely that of Scripture as food.

Trinitarian Theology, West and East Paul M. Collins, 2001 CURRENTLY BEING RE WORKED BY AUTHOR This book represents a unique contribution to the dialogue between the traditions of Eastern and Western Christian thought. Through the writings of Karl Barth and John Zizioulas, Dr Collins seeks to set up an ecumenical dialogue concerning Trinitarian thought. During the last decade the

doctrine of the Trinity and the concept of koinonia have been much in evidence in ecumenical contexts In this volume Dr Collins sets out to look behind the growing ecumenical consensus to examine where the basis for the consensus has emerged from and suggests that it is possible to root it in Western thought as well as in Eastern Orthodoxy **Beauty** Natalie Carnes,2014-11-13 Beauty engages fourth century bishop Gregory of Nyssa to address beauty s place in theology and the broader world With the recent resurgence of attention to beauty among theologians questions still remain about what exactly beauty is how it is perceived and whether we should celebrate its return If beauty fell out of favor because it was seen to distract from the weightier concerns of poverty and suffering because it can even be a tool of oppression why should we laud it now Gregory s writings offer surprisingly rich and relevant reflections that can move contemporary conversations beyond current impasses and critiques of beauty Drawing Gregory into conversation with such disparate voices as novelist J M Coetzee and art theorist Kaja Silverman Beauty displays the importance of beauty to theology and theology to beauty in a discussion that bridges ancient and modern practical and theoretical secular and religious **Models for Divine Activity.** (*The Zenos Lectures*, 1966.). Science and Earth History Arthur N. Strahler,1999-11-01

In this comprehensive treatment of the ongoing conflict between creationists and evolutionary scientists well known geomorphologist Arthur Strahler carefully examines creationists claims of scientific evidence for the six day divine creation of the universe followed by the catastrophic flood of Noah as claimed in Genesis The creationists arguments are examined and evaluated against the findings of mainstream science in the fields of cosmology astronomy geophysics geology paleontology and evolutionary biology Updated with a new preface and responses to recent attacks on evolutionary theory Science and Earth History can serve as both a popular overview of earth history and as a scholarly anecdote to the fictions of creationism once again finding their way into classrooms and universities Strahler illuminates the controversy by reviewing the philosophy methodology and sociology of empirical science as contrasted with the belief systems of religion and pseudoscience The author also includes lucid criteria for distinguishing science from pseudoscience and reviews the great discoveries and developments in science that point to the evolution of life over the earth's three billion year history
