Regulatory Competition in the Digital Economy Michael Denga, Lars Hornuf, 2025-02-24 The digital economy is reinvigorating regulatory competition yet little is known about which rules and jurisdictions can effectively bind companies nor what competitive motivations underlie certain rules In addition to purely economic motives legislators are now also driving the pursuit of digital sovereignty and the enforcement of social values in digital spaces It also remains unclear what regulatory weight the self regulation of private companies has in multi level governance systems This book examines regulatory competition in the three main pillars of digital markets artificial intelligence data and platforms It brings together legal scholars economists and information systems experts providing relevant examples and structured analysis of the aims and outcomes of regulatory competition in the digital economy A timely exploration of the balancing acts regulators must perform to manage private power in a globalized digital economy Essential for understanding the intersection of law economics and technology in the contemporary digital ecosystem Jens Frankenreiter Associate Professor of Law Washington University The book by Denga and Hornuf provides a comprehensive and timely exploration of the intricate regulatory challenges posed by big data artificial intelligence and platforms in the Digital Single Market It offers critical insights for policymakers scholars and businesses navigating this evolving landscape Philipp Hacker Professor for Law and Ethics of the Digital Society European University Viadrin Artificial Intelligence is fundamentally disrupting how we enable economic growth and how we regulate fair competition Luckily Denga and Hornuf provide a detailed and comprehensive overview of the thorniest and most complex regulatory issues while at the same time offering thoughtful and feasible solutions Regulatory Competition in the Digital Economy is a treasure trove for anyone interested in market regulation fair competition consumer protection and geopolitical questions Sandra Wachter Professor of Technology and Regulation Oxford Internet Institute

Managing Corporate Brands Marcos Ormeno, 2007-12-03 Marcos Ormeno introduces both behavioural science theory and decision analysis into corporate brand management using corporate communication He develops a managerial decision making model that outdoes existing approaches for selecting communication tools due to its high degree of formalisation and its strong behavioural basis An illustrative study supports the author's model and shows the importance of communication in building a corporate brand
