**Technological Concepts and Mathematical Models in the Evolution of Modern Engineering Systems** Mario Lucertini, Ana Millàn Gasca, Fernando Nicolò, 2003-11-27 This collection of historical research studies covers the evolution of technology as knowledge the emergence of an autonomous engineering science in the Industrial Age the idea of scientific management of production and operation systems and the interaction between mathematical models and technological concepts The book is published with the support of the UNESCO Venice Office Regional Office for Science Technology in Europe as an activity of the Project The evolution of events concepts and models in engineering systems     **The Engineering Project** Gene Moriarty, 2015-11-05 We all live our daily lives surrounded by the products of technology that make what we do simpler faster and more efficient These are benefits we often just take for granted But at the same time as these products disburden us of unwanted tasks that consumed much time and effort in earlier eras many of them also leave us more disengaged from our natural and even human surroundings It is the task of what Gene Moriarty calls focal engineering to create products that will achieve a balance between disburdenment and engagement How much disburdenment will be appropriate while still permitting an engagement that enriches one s life elevates the spirit and calls forth a good life in a convivial society One of his examples of a focally engineered structure is the Golden Gate Bridge which draws people to it enlivens and elevates the human spirit and resonates with the world of its congenial setting Humans bridge and world are in tune These values of engagement enlivenment and resonance are key to the normative approach Moriarty brings to the profession of engineering which traditionally has focused mainly on technical measures of evaluation such as efficiency productivity objectivity and precision These measures while important look at the engineered product in a local and limited sense But from a broader perspective what is locally benign may present serious moral problems undermining social justice environmental sustainability and health and safety of affected parties It is this broader perspective that is championed by focal engineering the subject of Part III of the book which Moriarty contrasts with modern engineering in Part I and pre modern engineering in Part II     **Proceedings of the 2025 4th International Conference on Engineering Management and Information Science (EMIS 2025)** Seyed Mohammadreza Ghadiri, Sri Devi Ravana, Mohd Johari Mohd Yusof, Shamzani Affendy Mohd. Din, 2025-06-23 This is an open access book 2025 4th International Conference on Engineering Management and Information Science EMIS 2025 aims to bring together researchers practitioners and industry experts from diverse fields to discuss the latest advancements and trends in engineering management and information science Building on the success of its previous editions EMIS 2025 will continue to foster an interdisciplinary platform that encourages collaboration and knowledge sharing among participants With rapid technological advancements and the increasing complexity of engineering projects this conference provides an essential forum for addressing the challenges and opportunities faced in the contemporary landscape Attendees will gain valuable insights explore cutting edge

research and network with peers to establish connections that can lead to innovative solutions and collaborations in the future EMIS 2025 will cover a wide range of topics pertinent to engineering management and information science including but not limited to project management methodologies data analytics in engineering risk management supply chain optimization and the impact of artificial intelligence on engineering practices Additionally the conference will explore the role of sustainability in engineering management innovative practices in information systems and the implications of emerging technologies in various engineering fields We invite original research papers case studies and panel discussions that contribute to the ongoing discourse in these areas Our aim is to highlight best practices and innovative approaches that can drive performance and efficiency in engineering and management sectors EMIS 2025 distinguishes itself from previous editions by incorporating a more robust focus on practical applications of emerging technologies in engineering management and a greater emphasis on sustainability This year we will feature specialized workshops and interactive sessions that allow participants to engage in hands on experiences fostering deeper learning and collaboration Additionally the conference will include keynote speeches from prominent leaders in the field who will share their insights on the future of engineering management and information systems Our commitment to inclusivity will be reflected in a wider range of topics and a richer diversity of speakers and participants ensuring that all voices are heard and represented in the discussions This evolution aims to enhance the conference experience making it more relevant and impactful for all attendees Welding Engineer
