Tom Perzentis of Octura Models, Chicago, uses jig saw to cut butchereads and curved fingers for the prototype of his famous gas powered model R/C hydro plane "White Head V". The jig saw produces a smooth cut in small intricate sections of plywood and balsa wood. Parts for motor and gearing assembly were turned out on Unimat Lathe.

Well known author, Bruce Ward, who designs electronic projects for national magazines, uses a Unimat to machine printed circuit boards, drill chassis holes, and wind special coils. This multifunctional machine takes up less space than the average oscilloscope, yet provides tool room versatility.
