Model Based Predictive Control A Practical Approach:

Model-Based Predictive Control J.A. Rossiter, 2003-06-27 Model Predictive Control MPC has become a widely used methodology across all engineering disciplines yet there are few books which study this approach Until now no book has addressed in detail all key issues in the field including apriori stability and robust stability results Engineers and MPC researchers now have a volume that provides a complete overview of the theory and practice of MPC as it relates to process and control engineering Model Based Predictive Control A Practical Approach analyzes predictive control from its base mathematical foundation but delivers the subject matter in a readable intuitive style The author writes in layman s terms avoiding jargon and using a style that relies upon personal insight into practical applications This detailed introduction to predictive control introduces basic MPC concepts and demonstrates how they are applied in the design and control of systems experiments and industrial processes The text outlines how to model provide robustness handle constraints ensure feasibility and guarantee stability It also details options in regard to algorithms models and complexity vs performance issues

Applications of Digital Signal Processing through Practical Approach Sudhakar Radhakrishnan, 2015-10-28 This book is recommended to readers who can ponder on the collection of chapters authored co authored by various researchers as well as to researchers around the world covering the field of digital signal processing This book highlights current research in the digital signal processing area such as communication engineering image processing and power conversion system The entire work available in the book mainly focusses on researchers who can do quality research in the area of digital signal processing and related fields Each chapter is an independent research which will definitely motivate young researchers to further study the subject These six chapters divided into three sections will be an eye opener for all those engaged in systematic research in these fields

Model Based Control Paul Serban Agachi,2006-11-10 Filling a gap in the literature for a practical approach to the topic this book is unique in including a whole section of case studies presenting a wide range of applications from polymerization reactors and bioreactors to distillation column and complex fluid catalytic cracking units A section of general tuning guidelines of MPC is also present These thus aid readers in facilitating the implementation of MPC in process engineering and automation At the same time many theoretical computational and implementation aspects of model based control are explained with a look at both linear and nonlinear model predictive control Each chapter presents details related to the modeling of the process as well as the implementation of different model based control approaches and there is also a discussion of both the dynamic behaviour and the economics of industrial processes and plants The book is unique in the broad coverage of different model based control strategies and in the variety of applications presented A special merit of the book is in the included library of dynamic models of several industrially relevant processes which can be used by both the industrial and academic community to study and implement advanced control strategies

Zoltan K Nagy received his PhD from Babes Bolyai University of Cluj where he worked as a lecturer until 2005 Before taking up his current appointment as a faculty member at Loughborough University UK he was NATO research fellow and visiting lecturer at the University of Illinois at Urbana Champaign and research associate at the University of Stuttgart University of Heidelberg and ETH Zurich His main research interest is in the model based control and optimization of chemical processes He worked on industrial implementation of model based control strategies with companies such as BASF and ABB and has published over 80 papers in the field

Arpad Imre Lucaci received his M S and Ph D degrees in chemical engineering from Babes Bolyai University of Cluj Napoca in 1985 and 1999 respectively Since 1988 he has worked in the Chemical Engineering Department of BBU Cluj Napoca Romania and spent research stays at University of Stuttgart 1994 and ETH Zurich in 2002 and 2003 His main research fields are mathematical modeling simulation and optimization in process industries on which he has published over 20 scientific papers

Cristea Vasile Mircea graduated the Faculty of Electrotechnics Romania with specialization on process control and computer science and holds a Ph D degree in process control After 8 years spent in industry he is at present Associate Professor at Babes Bolyai University Cluj Napoca his interests lie in systems theory chemical process control advanced process control data acquisition and control linear and nonlinear model based predictive control and fuzzy control He was director of CNCSIS Projects and has published 3 books as well as over 55 scientific papers

Professor Paul Serban Agachi graduated in 1970 in Control Engineering at the Politehnica University of Bucharest Obtained his Ph D in Chemical Engineering from the University Petroleum Gas Ploiesti Romania Professional experience design engineer system analyst researcher in fuel cells process modeling optimization and control At present professor of Process Control at the Department of Chemical Engineering of Babes Bolyai University Cluj Napoca and member of the Academy of Technical Sciences of

Romania He has been visiting associate at California Institute of Technology invited professor at E t v s Lorand University UNESCO Higher Education consultant He has published 8 books and 96 scientific papers

The Canadian Journal of Chemical Engineering ,2007-08 Neuro-Adaptive Process Control Peter M. Mills,Albert Y. Zomaya,Moses O.
