**Batch Modernization on z/OS** Mike Ebbers, Elsie Ramos, Snehal Antani, Patrick Bruinsma, Manuel Mueller, Martin Packer, Christian Strauer, Sridhar Sudarsan, Susann Thomas, Andreas Wagner, Janet Wall, IBM Redbooks, 2012-07-26 Mainframe computers play a central role in the daily operations of many of the world's largest corporations and batch processing is a fundamental part of the workloads that run on the mainframe. A large portion of the workload on IBM z/OS systems is processed in batch mode. Although several IBM Redbooks publications discuss application modernization on the IBM z/OS platform, this book specifically addresses batch processing in detail. Many different technologies are available in a batch environment on z/OS systems. This book demonstrates these technologies and shows how the z/OS system offers a sophisticated environment for batch. In this practical book, we discuss a variety of themes that are of importance for batch workloads on z/OS systems and offer examples that you can try on your own system. The audience for this book includes IT architects and application developers with a focus on batch processing on the z/OS platform.
