Lewerenz,2009 Purpose Practice management software has been used in optometric offices for many years but few optometrists make use of all the capabilities their software provides especially Electronic Health Records EHR This is troublesome because the National Health Information Infrastructure has set a deadline of 2015 to make EHR mandatory The ultimate goal is to have health information flow seamlessly between healthcare professionals while protecting patient confidentiality and guarding against inappropriate use The purpose of this study is to increase clinician knowledge of the practice management software available the capabilities it holds the relative perceived benefits of certain programs to others and the benefits of EHR Relative satisfaction of practice management software systems overall and their capabilities will also be determined Methods The subject group consisted of 185 optometric physicians from a variety of practice modalities They answered a questionnaire that specifically evaluated their number of years in practice software and EHR usage along with their satisfaction of several capabilities within their software Results Years in practice was relatively even for all choices An overwhelming majority of responders work in private practice Practice management software was utilized by 85% of responders and was updated within the last 6 months Only 41% use Electronic Health Records but 80% of those reported it

as a component of their practice management software Over half of responders were rated their practice management software and EHR better than average There was minimal difference in satisfaction between OfficeMate Compulink MaximEyes and PCIS Conclusion According to Edlow although over 80% of today s optometrists utilize the components of billing claim processing and bookkeeping a large majority does not utilize every component of their practice management software especially the EHR capability In the future it will be important for practice management software companies to have EHR as a staple feature Although the deadline of integrating EHR into each practitioner s office is growing near only a small number are utilizing this component      **Practice Management Manual (optometrist's Manual)** American Optometric Association.
