Mission Agogo:

Medicine, Faith and Politics in Agogo Pascal Schmid, 2018 Medicine Faith and Politics in Agogo examines the development of health care delivery at a former mission hospital in Ghana. It reveals the configurations of interests, values and ideologies that shaped the development and implementation of health care practices, strategies and concepts. By providing an in-depth analysis, the book contributes a particular perspective on the history of health care delivery in rural Africa and beyond. It addresses topics that are still heavily under-researched. These include the decolonisation of health care as well as the development and implementation of medical concepts for developing countries such as primary health care.

Dissertation Series Swiss African Studies Schweizerische Afrikastudien Etudes africaines suisses Vol 13 Subject African Studies History Religious Studies Health Care Studies Sociology **Science, Africa and Europe** Martin Lengwiler, Nigel Penn, Patrick Harries, 2018-10-12 Historically scientists and experts have played a prominent role in shaping the relationship between Europe and Africa. Starting with travel writers and missionary intellectuals in the 17th century European savants have engaged in the study of nature and society in Africa. Knowledge about realms of the world like Africa provided a foil against which Europeans came to view themselves as members of enlightened and modern civilisations. Science and technology also offered crucial tools with which to administer, represent and legitimate power relations in a new global world but the knowledge drawn from contacts with people in far-off places provided Europeans with information and ideas that contributed in everyday ways to the scientific revolution and that provided explorers with the intellectual and social capital needed to develop science into modern disciplines at home in the metropole. This book poses questions about the changing role of European science and expert knowledge from early colonial times to post-colonial times. How did science shape understanding of Africa in Europe and how was scientific knowledge shaped, adapted and redefined in African contexts?
