MMR Richard C. Horton,2004 The publication of Andrew Wakefield s work in The Lancet in 1998 inadvertently triggered a collapse of public confidence in the MMR vaccine Six years into this health crisis a key and much disputed part of the report was retracted Now The Lancet s editor Dr Richard Horton considers the implications of this affair Horton is an advocate of the MMR his own child has had the triple vaccine and here he gives an insider s account of the events surrounding this controversy He reviews the history of the MMR vaccine and the claims about its safety discussing why we consistently fail to debate controversial science rationally He analyses the malign influence of financial conflicts of interest in medical research today and looks at what might be done to improve our present understanding of autism He examines prospects for completely eradicating measles from the world a disease which kills 700 000 children each year **Health,**

**Risk and News** Tammy Boyce,2007 The controversy surrounding the measles mumps and rubella MMR vaccine and autism has raised unprecedented questions about the communication of health and science **Health Risk and News** The MMR Vaccine and the Media examines how this story came to be so influential and asks if the media are to blame for unduly panicking the public Drawing on comprehensive research on media coverage interviews with a range of journalists and sources and analysis of audience opinion this book explores how medical controversies are covered with attention to issues of balance and objectivity expertise news values risk and media effects It will be of interest to students and scholars of media studies journalists and health professionals

*New Methodological Perspectives on Observation and Experimentation in Science* Wenceslao J. González,2010-12-29 Observation and experimentation are central topics of philosophy and methodology of science The empirical sciences have commonly been associated to observational and experimental processes because they have been considered crucial for testing the contents of these Thus observation and experimentation have received attention from different angles and they have been historically relevant in the advancement of science Their philosophical

methodological analysis includes some key aspects those related to axiological epistemological and methodological issues **New Methodological Perspectives on Observation and Experimentation in Science** deals with a classic topic that is seen from new angles Its nine chapters seek non traditional aspects trying to extend the boundaries of this philosophical

methodological theme They are presented in five sections 1 A Philosophical Methodological Context 2 Experience and Scientific Observations 3 Empirical Support and Experiments in Science 4 Changes in the Framework on Observation and Experimentation and 5 Enlarging the Philosophical Scope Law and Ecology Wenceslao J Gonzalez is Professor of Logic and Philosophy of Science University of A Coru a He is a Full Member of the International Academy for Philosophy of Sciences AIPS Visiting fellow at the Center for Philosophy of Science University of Pittsburgh and a Team Leader of the European Science Foundation program entitled The Philosophy of Science in a European Perspective He has been named a Distinguished Researcher by the Main National University of San Marcos in Lima Peru He has been a visiting researcher at

the Universities of St Andrews M nster and London LSE He has given lectures at the Universities of Pittsburgh Stanford Quebec and Helsinki The conferences in which he has participated include those organized by the Universities of Uppsala New South Wales Bologna Canterbury NZ and Beijing He has edited 26 volumes on philosophy and methodology of science

Trusting Science Kostas Kampourakis,2025 Certain scientific fields have long been battlegrounds of controversy echoing a deep seated public distrust towards science This distrust is especially pronounced in areas of policy science that is science that informs policy decisions such as vaccination programs This book explores the roots of this distrust setting it apart from outright denial of science While absolute denial is rare distrust can be quite widespread often nourished by personal experiences or the persuasive testimonies of others Trusting Science embarks on a journey to uncover some underexplored causes of science distrust It thus underscores the necessity of demystifying science by illuminating the nature of scientific evidence the inevitable presence of uncertainty the indispensable role of expertise and the subtle sway of personal biases Drawing on historical examples from vaccination and other life sciences Trusting Science offers opportunities for reflection about how science is done and argues that a renaissance in science education and communication is crucial for cultivating realistic expectations and rebuilding public trust in science

**The Law-Science Chasm** Cedric Charles Gilson,2012-11-01 THE LAW SCIENCE CHASM is a socio legal study that takes seriously the varying approaches to science that physicians and scientists use as compared to legal actors such as judges and lawyers Offering a way to mediate and translate their different perspectives and assumptions Gilson uses sociological and philosophical methodologies to explain each discipline to the other Gilson s book takes seriously the idea of the autopoietic closure of society s communicative subsystems and works out the consequences in particular for science and law This analysis both lends support to the credibility of the approach adopted and sheds light on the problems and the direction in which potential solutions might lie The book consequently makes an important contribution not only to the literature dealing with the relationship between science and law but also to the literature dealing with the application of autopoietic systems theory to tangible concerns This book is therefore of clear significance to those continuing to wrestle with the challenges thrown up by science for law and policy even when the spotlight of public attention is directed elsewhere JOHN PATERSON Professor of Law University of Aberdeen from the Foreword Part of the new Dissertation Series from Quid Pro Books

**Vaccinating Britain** Gareth Millward,2019-01-29 Vaccinating Britain shows how the British public has played a central role in the development of vaccination policy since the Second World War It explores the relationship between the public and public health through five key vaccines diphtheria smallpox poliomyelitis whooping cough and measles mumps rubella MMR It reveals that while the British public has embraced vaccination as a safe effective and cost efficient form of preventative medicine demand for vaccination and trust in the authorities that provide it has ebbed and flowed according to historical circumstances It is the first book to offer a long term perspective on vaccination across different vaccine types This history provides context for students and researchers

interested in present day controversies surrounding public health immunisation programmes Historians of the post war British welfare state will find valuable insight into changing public attitudes towards institutions of government and vice versa An electronic edition of this book is freely available under a Creative Commons CC BY NC ND licence **New Scientist and Science Journal** ,2004 **New Scientist** ,2004 **Why Democracies Need Science** Harry Collins,Robert

Evans,2017-03-27 We live in times of increasing public distrust of the main institutions of modern society Experts including scientists are suspected of working to hidden agendas or serving vested interests The solution is usually seen as more public scrutiny and more control by democratic institutions experts must be subservient to social and political life In this book Harry Collins and Robert Evans take a radically different view They argue that rather than democracies needing to be protected from science democratic societies need to learn how to value science in this new age of uncertainty By emphasizing that science is a moral enterprise guided by values that should matter to all they show how science can support democracy without destroying it and propose a new institution The Owls that can mediate between science and society and improve technological decision making for the benefit of all *Contemporary Science Fiction and The Many-Worlds Interpretation of Quantum Mechanics* Jonathan P. Lewis,2025-10-02 This book seeks to create a new means of interrogating the direction in which contemporary science fiction is progressing In the late 1950s Hugh Everett III suggested that there is no way to say that there are not as many versions of what we experience as reality as there are particles in the universe This movement in contemporary science fiction serves as the foreground for the sense of loss and the need for sacrifice to set things right after generations of technological praxis by the nations and communities that have traditionally driven science fiction the Global North that have damaged communities throughout the Global South Colonialism and the drives for spheres of influence in the Cold War are now being met with the realities of such existential threats as global climate change Narratives about the loss of control over time reality and human consciousness demonstrate the on going ideological crises of faith in institutions like religion capitalism and education It is the grief for lost utopian dreams for the future that drives this interest in Everett s Many Worlds Interpretation of Quantum Mechanics or MWI

**Big Pharma** Jacky Law,2006 Pharmaceutical medicine is very very big business The top ten players earned more than 200 billion in 2003 One drug Pfizer s cholesterol pill Lipitor had sales of more than 9 billion This kind of money buys an awful lot of friends among doctors and politicians Most of those involved in the formulation of public health policy seems happy with the present system The trouble is that the public is starting to have doubts There is a growing sense that the vast profits of drug companies and their control of the research agenda might not be that good for our health Jacky Law takes the reader on a journey through the pharmaceutical business and shows how the public is quite right to be concerned about conventional medicine as it has developed since the late 1970s She tells a story of spectacular regulatory failure phenomenally high prices betrayal of the public interest and a growing awareness among ordinary people that things could be very different Sophisticated marketing and public relations not

scientific excellence have helped corporations to preside unchallenged over matters of life and death It is time Law argues for us to take responsibility for our health not as passive consumers of pharmaceutical medicine but as informed citizens

**Tribune for Victory and Socialism** ,2004 *Communication in the Age of Suspicion* Vian Bakir,David M.

Barlow,2007-04-12 *Communication in the Age of Suspicion* explores and interrogates the relationship between media and trust It begins by examining the decline of trust in key institutions and the relationship between Trust Studies and Media Studies Fourteen international contributions follow focusing on a variety of genres and examining a number of media forms Can we speak of The End of Trust The book concludes by delineating three emergent themes before outlining implications for media communication and future directions for research in this Age of Suspicion *International Who's Who of Authors and Writers* 2008 Europa Publications,2007-08-23 An invaluable source of information on the personalities and organizations of the literary world *Book Review Index Cumulation* Dana Ferguson,2005-09 Book Review Index provides quick access to reviews of books periodicals books on tape and electronic media representing a wide range of popular academic and professional interests The up to date coverage wide scope and inclusion of citations for both newly published and older materials make Book Review Index an exceptionally useful reference tool More than 600 publications are indexed including journals and national general interest publications and newspapers Book Review Index is available in a three issue subscription covering the current year or as an annual cumulation covering the past year *The British National Bibliography* Arthur James Wells,2006

**Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971** New York Public Library. Research Libraries,1979 **Novel and Short Story Writer's Market 96**

Robin Gee,1996 Fiction writers turn to this resource each year for infomation on fiction markets contests conferences writers colonies and other opportunities Helpful articles and interviews with professional writers add to the guide s appeal *Novel & Short Story Writer's Market* ,1996 *Psychology and Sociology Applied to Medicine* Beth Alder,Edwin van Teijlingen, MA, MEd, PhD,Michael Porter, BA, MPhil,2009-06-17 This textbook in the Illustrated Colour Text series offers an integrated treatment of sociology and psychology for medical students It is presented in a much more colourful and graphic format than is usual for books on these two subjects This integration reflects the tendency to teach these two subjects together as behavioural science with an increased stress on the place of medicine in society and on illness as a product of psychological and social circumstances rather than merely a biological phenomenon The book reflects these trends and has been successful and popular with students An integrated treatment of psychology and sociology for medical students in line with the trend towards teaching these subjects as behavioural sciences Use of case studies and Stop Think boxes encourages critical thinking and discussion Graphic Illustrated Colour Text presentation style enlivens a subject which most medical students are not keen on This third edition contains a new introduction on the importance and key features of the biopsychosocial model and additional double page spreads on International Health and Rural Health
