David Myers

Mobile Video Telephony:

Mobile Video Telephony David Myers, 2005 Wireless video is projected to become a 2.8 billion global business in less than five years. This is a system level design guide written for engineers deploying mobile video services around the world. Compiling relevant aspects of the many confusing standards and protocols surrounding video telephony, the author delivers a detailed tutorial on each phase of deployment from video compression through multiplexing and call control. **Wireless Internet Handbook** Borko Furht, Mohammad Ilyas, 2003-03-28 Wireless applications are definitely the next big thing in communications. Millions of people around the world use the Internet every day to stay in touch with remote locations, follow the stock market, keep up with the news, check the weather, make travel plans, conduct business, shop, entertain themselves, and learn. The logical next step is the **Audiovisual Quality Assessment and Prediction for Videotelephony** Benjamin Belmudez, 2014-12-27 The work presented in this book focuses on modeling audiovisual quality as perceived by the users of IP based solutions for video communication like videotelephony. It also extends the current framework for the parametric prediction of audiovisual call quality. The book addresses several aspects related to the quality perception of entire video calls, namely the quality estimation of the single audio and video modalities in an interactive context, the audiovisual quality integration of these modalities, and the temporal pooling of short sample based quality scores to account for the perceptual quality impact of time varying degradations. *Media Space 20+ Years of Mediated Life* Steve Harrison, 2009-06-04 *Media Space 20 Years of Mediated Life* is loosely divided into three different but interconnected approaches to media space research. Each part opens with an introduction that lays out how readers can best approach the book and provides a basic guide to the theory and research literature, technological developments, and other notable events to help contextualize the book. The social approach uses the rhetoric and methods familiar to a CSCW audience but moves into actual situations that involve close working bonds, broken trust, shared joy, community building, interpersonal tension, anxiety, etc. The section on spatial approaches guides the reader through an intellectual landscape of spatiality. The communications part is a field guide to sense making in the as-lived mediated condition, demonstrating that media space sense making combines an understanding of in-the-moment alongside sense made of existence in the world and reflecting upon it. **Video Communications and PACS for Medical Applications** Rudy A.
