capitalism **African American Environmental Thought** Kimberly K. Smith, 2007 Examines the works of Frederick Douglass Booker T Washington W E B Du Bois and several other canonical figures to uncover a rich and vital tradition of black environmental thought from the abolition movement through the Harlem Renaissance Provides the first careful linkage of the early conservation movement to black history the first detailed description of black agrarianism and the first analysis of scientific racism as an environmental theory **Against the Machine** Nicols Fox, 2002-10 From the cars we drive to the instant messages we receive from debate about genetically modified foods to astonishing strides in cloning robotics and nanotechnology it would be hard to deny technology s powerful grip on our lives To stop and ask whether this digitized implanted reality is quite what we had in mind when we opted for progress or to ask if we might not be creating more problems than we solve is likely to peg us as hopelessly backward or suspiciously eccentric Yet not only questioning but challenging technology turns out to have a long and noble history In this timely and incisive work Nicols Fox examines contemporary resistance to technology and places it in a surprising historical context She brilliantly illuminates the rich but oftentimes unrecognized literary and philosophical tradition that has existed for nearly two centuries since the first Luddites the machine breaking followers of the mythical Ned Ludd lifted their sledgehammers in protest against the Industrial Revolution Tracing that current of thought through some of the great minds of the 19th and 20th centuries William Blake Mary Shelley Charles Dickens John Ruskin William Morris Henry David Thoreau Ralph Waldo Emerson Robert Graves Aldo Leopold Rachel Carson and many others Fox demonstrates that modern protests against consumptive lifestyles and misgivings about the relentless march of mechanization are part of a fascinating hidden history She shows as well that the Luddite tradition can yield important insights into how we might reshape both technology and modern life so that human community and environmental values take precedence over the demands of the machine In **Against the Machine** Nicols Fox writes with compelling immediacy bringing a new dimension and depth to the debate over what technology means both now and for our future **The Cambridge History of the Gothic: Volume 2, Gothic in the Nineteenth Century** Catherine Spooner, 2020-08-06 This second volume of *The Cambridge History of the Gothic* provides a rigorous account of the Gothic in British American and Continental European culture from the Romantic period through to the Victorian fin de si cle Here leading scholars in the fields of literature theatre architecture and the history of science and popular entertainment explore the Gothic in its numerous interdisciplinary forms and guises as well as across a range of different international contexts As much a cultural history of the Gothic in this period as an account of the ways in which the Gothic mode has participated in the formative historical events of modernity the volume offers fresh perspectives on familiar themes while also drawing new critical attention to a range of hitherto overlooked concerns From Romanticism to Penny Bloods Dickens and even the railway system the volume provides a compelling and comprehensive study of nineteenth century Gothic culture **Critical Essays on Aldous Huxley** Jerome Meckier, 1996 Each volume in this series provides an introduction tracing the subject

author's critical reputation trends in interpretation developments in textual and biographical scholarship and reprints of selected essays and reviews beginning with the author's contemporaries and continuing through to current scholarship Many volumes also feature new essays by leading scholars and critics specially commissioned for the series **Design by Accident** Alexandra Midal,2023-09-26 A counterhistory and new historiography of design In *Design by Accident* Alexandra Midal declares the autonomy of design in and on its own terms This meticulously researched work proposes not only a counterhistory but a new historiography of design shedding light on overlooked historical landmarks and figures while reevaluating the legacies of design's established luminaries from the nineteenth century to the present Midal rejects both linear narratives of progress and the long held perception of design as a footnote to the histories of fine art and architecture By weaving critical analysis of the canon of design history and theory together with special attention to the writings of designers themselves she draws out the nuances and radical potentials of the discipline from William Morris's ambivalence toward industry to Catharine Beecher's proto feminist household appliances to the Bauhaus's Expressionist origins and the influence of Herbert Marcuse on Joe Colombo **Utopias in the English-speaking World and the Perception of Economic Reality** Thorsten Bagschik,1996 **The Journal of William Morris Studies** ,2008 *D.H.
