Newts Of The British Isles:

Newts of the British Isles Patrick J. Wisniewski,1989 *Tadpole Hunter* Arnold Cooke,2023-08-15 This book describes the history of amphibian conservation and research in Britain It is packed with unique insights from the author who in the late 1960s was probably Britain s first professional amphibian conservationist At that time the situation for amphibians was extremely serious after three decades of population decline Up to the 1990s Arnold Cooke was directly involved in understanding and trying to remedy the situation via research legislation and active conservation He initiated long term monitoring surveillance and studies that continued well into this century This research developed and utilised simple monitoring techniques such as counting breeding newts at night or toads dead on roads The resulting datasets also proved of value in determining whether breeding behaviour was affected by climate change This personal overview charts in detail how amphibian conservation developed from a relatively low knowledge base with few individuals involved to an abundance of information available for the many groups of people now active in the field It includes published unpublished and no longer readily accessible material to emphasise how contemporary knowledge attitudes and resources affected what was done and what happened as a result Various policies strategies laws and other initiatives have helped stop or slow declines but the future is still uncertain The book will appeal to a broad readership from naturalists to professional herpetologists Furthermore this story will have relevance for amphibian conservation in other countries in light of their more recent widespread declines It is also of interest to those wanting to know more about the development of wildlife conservation in Britain Amateur Aquarist & Reptilian Review ,1924 The Reader's Digest Complete Atlas of the British Isles Reader's Digest Association (Great Britain),1965 **European Animals** Robert Francis Scharff,1907 **A Sketch of the Natural History (vertebrates) of the British Islands** Frederick George Aflalo,1898 The British Herpetological Society Bulletin ,1993 A Guide to the Natural History of the Isle of Wight Frank Morey,1909 The Newton object-lesson handbook Newton object-lesson handbook,1900 The Naturalist ,1905 Mammals, Reptiles & Amphibians of Britain & Europe Paul Morrison,1994 *Reptiles, Amphibia, Fishes and Lower Chordata* Richard Lydekker,George Albert Boulenger,John Arthur Thomson,1912 **Essential Novelists - Karel Capek** August Nemo,Karel Capek,2019-06-27 Welcome to the Essential Novelists book series were we present to you the best works of remarkable authors For this book the literary critic August Nemo has chosen the two most important and meaningful novels of Karel Capek which are *The Absolute at Large* and *The War with the Newts* Karel apek was a Czech writer playwright and critic He has become best known for his science fiction including his novel *War with the Newts* and play *R U R* which introduced the word robot He also wrote many politically charged works dealing with the social turmoil of his time Influenced by American pragmatic liberalism he campaigned in favor of free expression and strongly opposed the rise of both fascism and communism in Europe Novels selected for this book *The Absolute at Large* *The War with the Newts* This is one of many books in the series Essential

This book describes how the various alien reptiles and amphibians now living in the wild throughout the world were first
introduced how they subsequently became naturalized their present distribution and status in those countries to which they
were introduced and their ecological and socio economic impact if any on the native biota and local economies Many species
have had a more or less neutral impact being neither beneficial nor harmful However several have had a positive ecological
or socio economic impact while some such as the cane toad have had an extremely destructive effect The criteria for
inclusion of a species are that it should have been imported from its natural range to a new country by human agency either
accidentally or deliberately and that it should currently be established in the wild in self maintaining and self perpetuating
populations unsupported by and independent of mankind **Bulletin of the Museum of Comparative Zoology** Harvard
