**NGOs, Civil Society and Structural Changes** Acar Kutay, 2021-06-22 This book suggests that our notions of civil society have undergone radical changes including structural changes in the nature of Civil Society Organizations CSOs and Non Governmental Organizations NGOs Such massive structural changes greatly problematize the older liberal view of a simple split between state and civil society actors which nonetheless remains dominant in much of social and political sciences The author argues that the naturalist and behaviorist approaches to civil society occlude the fact that citizens increasingly live within a particular and highly contestable way of imagining and constructing civil society The book shows that changes in how civil society is conceptualized and organized around new practices might mark radically new conceptions of the state that are ideologically neo liberal and subtle in the ways they disempower ordinary citizens

**NGOs, Civil Society, and the State** Andrew Clayton, 1996-01 Support for civil society has become a major concern for development agencies However there has been confusion about the role of non governmental development organizations NGOs in civil society Sometimes the funding of NGOs has simply been re phased as support for civil society Yet NGOs form only one group of organizations within civil society Often they are funded from external sources and lack local legitimacy and accountability This book contains papers by practitioners and researchers that examine the role of NGOs in civil society It includes general thematic papers on civil society case studies from Africa Asia and Latin America and Eastern Europe and papers that analyze initiatives undertaken by Northern NGOs and donors in democratization programmes in the South The stimulus for this book was an INTRAC workshop to reflect on the implications of the new civil society policy agenda for NGOs especially for countries undergoing major political transition

**NGOs** Thomas Davies, 2014-01-11 In the first historical account of international NGOs from the French Revolution to the present Thomas Davies places the contemporary debate on transnational civil society in context In contrast to the conventional wisdom which sees transnational civil society as a recent development taking place along a linear trajectory he explores the long history of international NGOs in terms of a cyclical process characterized by three major waves the era to 1914 the inter war years and the period since the Second World War The breadth of transnational civil society activities explored is unprecedented in its diversity from business associations to humanitarian organizations peace groups to socialist movements feminist organizations to pan nationalist groups The geographical scope covered is also extensive and the analysis is richly supported with reference to a diverse array of previously unexplored sources By revealing the role of civil society rather than governmental actors in the major transformations of the past two and a half centuries this book is for anyone interested in obtaining a new perspective on world history The analysis concludes in the second decade of the twenty first century providing insights into the trajectory of transnational civil society in the post 9 11 and post financial crisis eras

**NGOs And Civil Society** Ann Hudock, 1999-11-05 This accessible book provides a concise introduction to the way in which non governmental organizations NGOs work

**NGOs, Civil Society, and the Public Sphere** Sabine Lang, 2012 This book investigates how nongovernmental organizations can become stronger advocates for citizens and better representatives of their interests Non-Governmental Organizations and Development David Lewis, Nazneen Kanji, 2009-09-10 Non governmental organizations NGOs are high profile actors in the field of international development both as providers of services to vulnerable individuals and communities and as campaigning policy advocates This book provides a critical introduction to the wide ranging topic of NGOs and development Written by two authors with more than twenty years experience of research and practice in the field the book combines a critical overview of the main research literature with a set of up to date theoretical and practical insights drawn from experience in Asia Europe Africa and elsewhere It highlights the importance of NGOs in development but it also engages fully with the criticisms that the increased profile of NGOs in development now attracts Non Governmental Organizations and Development begins with a discussion of the wide diversity of NGOs and their roles and locates their recent rise to prominence within broader histories of struggle as well as within the ideological context of neo liberalism It then moves on to analyze how interest in NGOs has both reflected and informed wider theoretical trends and debates within development studies before analyzing NGOs and their practices using a broad range of short case studies of successful and unsuccessful interventions David Lewis and Nazneen Kanji then moves on to describe the ways in which NGOs are increasingly important in relation to ideas and debates about civil society globalization and the changing ideas and practices of international aid The book argues that NGOs are now central to development theory and practice and are likely to remain important actors in development in the years to come In order to appreciate the issues raised by their increasing diversity and complexity the authors conclude that it is necessary to deploy a historically and theoretically informed perspective This critical overview will be useful to students of development studies at undergraduate and masters levels as well as to more general readers and practitioners The format of the book includes figures photographs and case studies as well as reader material in the form of summary points and questions Despite the growing importance of the topic no single short up to date book exists that sets out the main issues in the form of a clearly written academically informed text until now

*An Uncivil Approach to Civil Society* Matthew Schaaf, T. Lokshina, Human Rights Watch (Organization), Alexander Petrov, 2009 In his first year in office President Dmitry Medvedev has done little to reverse the Russian government's deliberate weakening of key institutions of a pluralistic democratic society which marked the presidency of Vladimir Putin One key aspect of this growing authoritarianism has been increasing excessive government scrutiny and control of nongovernmental organizations mainly through the 2006 law regulating NGOs This report describes how the law and current rules allow the state to interfere arbitrarily in NGOs by conducting intrusive audits imposing onerous reporting requirements and impeding NGO registration on non substantive insignificant grounds It documents how the law allows the Ministry of Justice to take disproportionate punitive measures in response to minor administrative violations by NGOs The report also

describes how the deeply negative operating climate for NGOs is exacerbated by new restrictions on grants and subsidized office space and a growing number of physical attacks and hostile statements directed at NGOs and activists President Medvedev in April 2009 acknowledged the difficulties faced by NGOs including restrictions without sufficient justification occasioning some optimism that Medvedev will break with restrictive policies instituted under Putin Soon thereafter Medvedev initiated a limited process for reforming the troublesome law initial reforms will affect only a fraction of NGOs and are limited in scope Human Rights Watch calls on the Russian government to expand the reform to all organizations and end and desist from further arbitrary limitations on the work of independent civil society groups P 4 of cover

*Civil Society by Design* Kendall Stiles, 2002-06-30 Drawing on years of research and direct experience in Bangladesh Stiles pulls together theoretical strands from economics sociology and anthropology to help explain an emerging social structure in the Third World These structures which he calls intermestic development circles bring together international donor agencies with various domestic community and private organizations In Bangladesh not for profit agencies are dramatically transforming their operation and organizational cultures while in turn Western NGOs are themselves changing in subtle ways Scholars of development will find Stiles s intriguing account of the reciprocating effects of extensive interaction cooperation and tensions between international donors and domestic recipients informative and provocative Moving through three discernable phases each one explainable by resort to different theories these development circles grow from mere trading arrangements to a coherent social structure separate from the rest of civil society in Bangladesh While in the process of the not for profits receiving assistance become wealthier and more effective they lose much of their local identity and become part of a transnational network At the same time donors must recast themselves in order to work effectively with these agencies which often creates tension between local and home offices The book closes with some recommendations that might attenuate some of the more troubling effects of this transformation

*The Third Sector* Meghan Kallman, Terry Clark, 2016-10-17 Civil society organizations nonprofits national and international nongovernmental organizations and a variety of formal and informal associations have coalesced into a world political force Though the components of this so called third sector vary by country their cumulative effects play an ever greater role in global affairs Looking at relief and welfare organizations innovation organizations social networks and many other kinds of groups Meghan Elizabeth Kallman and Terry Nichols Clark explore the functions impacts and composition of the nonprofit sector in six key countries Chinese organizations for example follow the predominantly Asian model of government funding that links their mission to national political goals Western groups by contrast often explicitly challenge government objectives and even gain relevance and cache by doing so In addition Kallman and Clark examine groups in real world contexts providing a wealth of political historical background in depth consideration of interactions with state institutions region by region comparisons and suggestions for how groups can borrow policy options across systems Insightful and forward seeing *The Third Sector* provides a rare international view of

organizations and agendas driving change in today's international affairs      *Civil Society and Nongovernmental Organizations (NGOs) in Thailand. History, Politics, and State-Society Relations* Theerapat Ungsuchaval, 2016-10-19      *Civil Society in Japan* K. Hirata, 2002-08-16 Civil Society and Japan's Foreign Aid examines the changing relations between the Japanese state and non governmental organizations NGOs in promoting effective aid policies and analyzes the changing nature of policy making and governance in Japan It is based on extensive research in Southeast Asia and Japan investigating the role of Japanese aid in fields such as education health care environmental protection and economic development It analyzes the key players in aid policymaking including donor governments multinational organizations international and local NGOs the business community and aid recipients      *The Role of NGOs and Civil Society in Conflict and Humanitarian Efforts*, 2000 This document is a compilation of papers on the role of nongovernmental organizations NGOs NGOs as peacemakers and peacebuilders NGO military co operation civil military co operation the roles of the United Nations and the North Atlantic Treaty Organization multinational corporations and human rights government funding of NGOs and interventions in Bosnia El Salvador South Africa and India      *NGOs as Legitimate Partners of Corporations* Dorothea Baur, 2011-08-21 The interaction between corporations and non governmental organizations NGOs has become an important topic in the debate about corporate social responsibility CSR Yet unlike the vast majority of academic work on this topic this book explicitly focuses on clarifying the role of NGOs not of corporations in this context Based on the notion of NGOs as political actors it argues that NGOs suffer from a multiple legitimacy deficit they are representatives of civil society without being elected the legitimacy of the claims they raise is often controversial and there are often doubts regarding the legitimacy of the behaviour they exhibit in putting forward their claims Set against an extended sphere of political action in the postnational constellation this book argues that the political model of deliberative democracy provides a meaningful conceptualization of NGOs as legitimate partners of corporations and it develops a conceptual framework that specifically allows distinguishing legitimate partner NGOs from two related actor types with whom they share certain characteristics but who differ with respect to their legitimacy These related actor types are interest groups on the one hand and activists on the other hand In conclusion it argues that a focus on the behaviour of NGOs is most meaningful for distinguishing them from interest groups and activists      **NGOs, Political Protest, and Civil Society** Carew Boulding, 2014-06-23 This book argues that non governmental organizations NGOs have an important effect on political participation in the developing world Contrary to popular belief they promote moderate political participation through formal mechanisms such as voting only in democracies where institutions are working well This is a radical departure from the bulk of the literature on civil society that sees NGOs and other associations as playing a role in strengthening democracy wherever they operate Instead Carew Boulding shows that where democratic institutions are weak NGOs encourage much more contentious political participation including demonstrations riots and protests Except in extreme cases of poorly functioning democratic institutions however

the political protest that results from NGO activity is not generally anti system or incompatible with democracy again as long as democracy is functioning above a minimal level

**Organizing for Democracy** G. Sidney Silliman, Lela Garner Noble, 1998-05-01 The number variety and political prominence of non governmental organization in the Philippines present a unique opportunity to study citizen activism Nearly 60 000 in number by some estimates grassroots and support organizations promote the interests of farmers the urban poor women and indigenous peoples They provide an avenue for political participation and a mechanism unequaled elsewhere in Southeast Asia for redressing the inequities of society Organizing for Democracy brings together the most recent research on these organizations and their programs in the first book addressing the political significance of NGOs in the Philippines

**Supporting Civil Society** Laura Macdonald, 2016-07-27 Many analysts are looking to non governmental organizations NGOs as the promoters of more equitable and democratic forms of development because of their status as actors in civil society Based on a critical evaluation of six rural development projects in Costa Rica and Nicaragua Supporting Civil Society shows that NGOs often perpetuate paternalism and dependency It is argued that both international and national NGOs need to support social movements which are best able to express the demands of people at the grassroots

**Development, Social Justice, and Civil Society** Thomas J. Ward, Thomas Joseph Ward, 2005 Noted NGO figures from around the world contributed to this volume about how NGOs contribute to the development of society Included is a proposed code of ethics for NGOs Fear and Want These two words summarize the sufferings of humankind across history Endeavoring to free people from fear and want is both the most noble and the most difficult challenge that we face To promote human security is an ambitious goal but it is commensurate with the needs and aspirations of the twenty first century Fran ois Fouinat Executive Director UN Commission on Human Security An NGO should not enter into collaboration with a for profit corporation if the main motivation of the corporation is to gain a market advantage over competitors WANGO Code of Ethics and Conduct for NGOs The corporate community must accept that business is not merely charged to manage risk or make sound investment decisions and attempt to cope with economic uncertainties Those are the easier tasks The corporate community needs to reflect on what it can do to bring about changes that will create a new ethical and level playing field on which business can function place fairly and transparently without corruption Tunku Abdul Aziz Vice Chairman Transparency International In 1991 less than 10% of our projects had any input from NGOs By the end of the 1990s over half of Asian Development Bank ADB projects included NGO input Robert Dobias Head NGO Center Asian Development Bank NGOs that challenge existing political arrangements and challenge those government policies which pose a threat to human security can face serious repercussions from the implicated governments that are unwilling to hear public criticism of their actions Some governments have sought to restrict the power of NGOs by creating legislation which limits their sanctioned activity to the non political arena Sarah Mich l Harvard University Global Equity Initiative This book is an introduction to the political economy of NGOs Today NGOs are recognized as vital partners

for government and industry They address social and environmental problems with greater efficiency and cost effectiveness than government agencies Multilateral institutions such as the United Nations and the World Bank increasingly rely on NGOs to assist in the oversight of the projects and programs that they support This text reviews the historical evolution that has led to the mainstreaming of NGOs and in some cases to corruption graft and deviation from their founding principles It also describes the challenges that NGOs face in less developed countries While NGOs are applauded by international organizations and by the governments of developed countries they still are viewed as a political threat in many developing countries where they are deliberately marginalized by legal constraints and bureaucracies that make their survival almost impossible

*Building Civil Society in Authoritarian China* John W. Tai, 2014-08-28 How is modern civil society created There are few contemporary studies on this important question and when it is addressed scholars tend to emphasize the institutional environment that facilitates a modern civil society However there is a need for a new perspective on this issue Contemporary China where a modern civil society remains in a nascent stage offers a valuable site to seek new answers Through a comparative analysis of nongovernmental organizations NGOs in today's China this study shows the importance of the human factor notably the NGO leadership in the establishment of a modern civil society In particular in recognition of the social nature of NGOs this study engages in a comparative examination of Chinese NGO leaders state linkage media connections and international ties in order to better understand how each factor contributes to effective NGOs
