Missile Defenses And Western European Security:

Missile Defenses and Western European Security Robert M. Soofer, 1988-11-22 **Missile Defenses and Western European Security** is an important contribution to the current debate on how new weapons initiatives will affect prospects for world peace. Soofer generously sprinkles the book with relevant quotes from high ranking NATO officials, respected academicians and military policy experts, thus enhancing the reader's understanding of the subject. Friday Review of Defense Literature. The NATO alliance has come under increasing strain since President Reagan's announcement of plans for the strategic defense initiative SDI in March 1983. This study examines the logic underlying Western European reactions to SDI and assesses the validity of European anxieties about missile defenses. Systematically analyzing the positions of France, Britain and West Germany on the full spectrum of NATO defense issues, the author attempts to determine whether strategic and tactical missile defenses can in fact contribute to U.S. and Western security. In his introduction, the author traces the history of NATO's doubts concerning the strategic nuclear guarantee which were frequently expressed after the Soviets' first successful missile launches in the late 1950s. He next looks at Western European reactions to the SDI announcement and NATO's strategic thinking on deterrence and escalation. He discusses the relation between arms control considerations and the strategic defense initiative, focusing on NATO fears that SDI would lead to the abrogation of the 1972 ABM Treaty and with it the end of the arms control process. Turning to antitactical missile defense, Soofer argues that despite political opposition there exists a substantial strategic rationale for missile defenses deployed in Western Europe. Offering clarification and new perspectives on many complex defense issues, **Missile Defenses and Western European Security** will be an important contribution to the current debate on how new weapons initiatives will affect prospects for world peace. This timely book is for specialists, students and academics in the fields of strategic studies, peace studies, arms control, diplomacy and international relations.

[Sdi And European Security](#) Regina Cowen, Peter Rajcsanyi, Vladimir Bilandzic, F. Stephen Larrabee, 2019-09-16. Originally published in 1987. European concerns about strategic defense and its impact on the stability of the East-West strategic balance have been the subject of frequent and lively discussion at the Institute for East-West Security Studies in the more than four years since President Reagan announced his Strategic Defense Initiative (SDI) in March

NATO and European Security Alexander Moens, Lenard J. Cohen, Allen G. Sens, 2003-03-30. From the end of the Cold War to the terrorist attacks on the United States in September 2001 the NATO Alliance has changed profoundly. This book explores the multifaceted consequences of NATO's adjustment to new international and domestic political and security realities. Internal Alliance politics and matters of relative power within the membership have strongly influenced recent NATO developments. Several major issues challenging the Alliance are examined, including how the impact of efforts to develop an enhanced common European security and defense policy have affected NATO whether missile defense is driving the United States and its European allies closer or further apart, how the experience of NATO in the Balkans and elsewhere brought alliance members together or made NATO cohesion more difficult to maintain and in what way the changing role of NATO has influenced American and Canadian participation in the Alliance. An important guidepost to pivotal changes and likely NATO developments, scholars and policymakers of Atlantic and international politics will find these meditations indispensable. A number of authors also speculate on the likely changes for the alliance that will ensue in the wake of the September 11 terrorist attacks and the possibility that NATO will soon modify its mission and responsibilities in reaction to the threat of international terrorism. Indeed many of the same strategies and strains that affected NATO cohesion over the past decade are likely to complicate efforts to maintain Alliance unity as part of the anti-terrorist coalition.

In October 1987 on the eve of the Washington summit the Committee on Atlantic Studies, a group of

European and North American scholars established in 1964 to promote transatlantic dialogue met in Toronto to discuss the implications of the new arms control for European security. This book is the fruit of that meeting. Incorporating subsequent developments up to Gorbachev's December 1988 speech to the UN, it provides a timely assessment of arms control issues from a variety of European and North American perspectives. The contributors to this volume council caution, suggesting that while progress is possible, it will probably be slow. At a time when arms control has arrived at a significant crossroads, the issues raised in Arms Control and European Security are of critical importance to both Europeans and Americans. This volume stresses the interplay of strategic and regional arms control. It includes analyses of nuclear, conventional and naval arms control questions and embodies a broader conception of arms control. The book links arms control to such political measures as confidence building, conflict avoidance and superpower agreement to the neutrality of particular states.

Each contributor has written a chapter in which he or she analyzes threat perceptions in a national context and evaluates various prescriptions for improving the security situation within a long term framework. In addition, the contributors propose a series of concrete measures for building a stronger European consciousness in the security and defense area. This volume also contains bibliographic information on research institutions and recent books in the field.

European Security, Prospects for the 1980s Derek Leebaert, 1979 Forfattere Stephen J. Barett, Dennis Blacker, Robert W. Dean, Kevin Devlin, Stephen J. Flanagan, Linda B. Miller, N. Edwina Moreton, Jane M. O. Sharp og Henry Stanhope *The Strategic Defense Initiative and European Security* Nanette C. Brown, Rand Corporation, 1986 This report summarizes the presentations and discussions of a conference on the US Strategic Defense Initiative and European Security held in March 1985. The conference participants were government officials and defense analysts from the Federal Republic of Germany, France, Great Britain and the United States. The conferees overwhelmingly supported research on the Strategic Defense Initiative as a hedge against Soviet ballistic missile defense programs. However, support for development or deployment hinged in part on whether Soviet actions were seen as being linked to US actions. These views, along with the assumption that the Soviet Union would field defenses if the United States did, reflected differences in concern about the implications of strategic defenses for 1. deterrence in general, 2. NATO strategy and deterrence in Europe, 3. arms control and 4. European
