## **New Wood Architecture In Scandinavia:**

*Neue Holzarchitektur in Skandinavien* Christoph Affentranger, 1997 Wood architecture is gaining importance worldwide The aesthetic technical and ecological advantages of this regenerative building material are obvious This monograph is the first to present a definitive documentation of the important examples in wood architecture in Denmark Iceland Norway Sweden and Finland The book offers a detailed analysis of 19 buildings with photographs drawings and technical details and briefly introduces 71 further buildings The selection is based not only on aesthetic and architectural criteria but also on the merit of innovative solutions to technical problems All manner of buildings are represented here from single family homes to churches from industrial buildings to libraries from temporary experimental architecture to large halls Historical exponents illustrate the importance of a centuries old tradition in Scandinavia modular construction framed church buildings etc and analyse their inspirational role for today's architects This monograph offers an extensive and exciting image and a few surprises of contemporary wood architecture in Northern Europe An indispensable book including a commented bibliography as well as indices of names and locations for specialists and non specialists interested in wood architecture

**Living Wooden Culture Throughout Europe** Nuria Sanz, Council of Europe. Cultural Heritage Division, Council of Europe. Directorate of Culture and Cultural and Natural Heritage, Council of Europe. Directorate General IV--Education, Culture, Youth and Sport, Environment, 2002-01-01 European wood heritage is a living tradition still in use in some regions of Europe but also represents one of the most threatened forms of cultural expression This publication contains a number of papers presented at a series of transnational meetings organised by the Council of Europe to examine traditional building methods and compare experience and techniques on preserving this form of cultural heritage It seeks to raise awareness of the social and economic value of wooden traditions in local communities throughout Europe *Scandinavian Design and its Philosophical Underpinnings to a Social Democracy* Nicholas Tam, 2016-07-14 Modernism and principles of Functionalism came to prominence in Scandinavia during the early 20th century becoming influential in shaping the distinct character of Scandinavian Design as we recognize today Through text photographs and info graphics we examine the unique historical and political phenomena of Scandinavia to gain a broader understanding of the rise of social democracy in the region and its pertinence to the philosophical underpinnings of a national design identity Precedented Environmental Futures Colin Porteous, 2019-04-17 This book addresses the built environment through the lens of environmental architecture and in a holistic manner It moves gradually from psychophysiology and thinking doing feeling modalities through environmental criteria to environmental modulation concluding with a debate around mitigation and adaptation Much use is made of re interpreting past quotations seen as relevant for environmental architecture No definitive conclusions are reached but rather broad discursive messages are offered The text will have lasting luminance for new generations involved with the built environment *Buildings in Wood* Will Pryce, 2005 From the very beginning of architecture long before the invention of

masonry buildings were constructed of wood With its unique qualities of form color and structure wood is the most reliable building material at the core of architecture This epic history is the first comprehensive survey of the use of wood in architecture throughout the ages The book is organized both chronologically and geographically It surveys works from the oldest heritage of wooden buildings Kyoto s Buddhist temples and Scandinavia s pagan inspired stave churches to the latest cutting edge designs proving that wood is on the rise as the preferred material in these ecologically conscious times No region of the world with a native tradition of building with wood is left out In North America the book demonstrates the European origins of New England s clapboards and saltboxes and later shows how such sophisticated California architects as Greene Greene or Bernard Maybeck could blend age old traditions of the Far East and Switzerland with a Pacific Coast sense of novelty and whimsy Spectacular and diverse photographs highlight the architectural masterpieces of wooden architecture throughout the world illustrating that wood is a building material with a deep history as well as a vibrant future *The*

*Architects' Journal* ,1997-09 **Wood Products, International Trade and Foreign Markets** ,1997 *The American-Scandinavian review* ,1929 **Architecture Re-assembled** Trevor Garnham,2013-04-26 Beginning from the rise of modern history in the eighteenth century this book examines how changing ideas in the discipline of history itself has affected architecture from the beginning of modernity up to the present day It reflects upon history in order to encourage and assist the reader in finding well founded principles for architectural design This is not simply another history of architecture nor a history of histories Setting buildings in their contemporaneous ideas about history it spans from Fischer von Erlach to Venturi and Rossi and beyond to architects working in the fallout from both the Modern Movement Aalto Louis Kahn Aldo van Eyck and Post modernism such as Rafael Moneo and Peter Zumthor It shows how Soane Schinkel and Stirling amongst others made a meaningful use of history and contrasts this with how a misreading of Hegel has led to an abuse of history and an uncritical flight to the future This is not an armchair history but a lively discussion of our place between past and future that promotes thinking for making *Scandinavia of the Scandinavians* Henry Goddard Leach,1917
