

Yours

I have perused your very ingenious Theory of Vision
in web (to be free wth you as a friend should be) there
seems to be some things more solid & satisfactory, others
more disputable but yet plausibly suggested & well
deserving of consideration of your ingenious. The more
satisfactory I take to be your asserting of we see
wth both eyes at once. your speculation about of use
of the musculus obliquus inferior. your assigning every
fiber in the optic nerve of one eye to have its
correspondent in that of the other, both w^{ch} make all
things appear to both eyes in one & of same place
& your solving briefly of duplicity of object in
disordered eyes & confuting of childish opinion about of
splitting of optic cone. The more disputable seems
your notion about every pair of fellow fibres being
unisons to one another. Discords to of rest, & this con
sonance making of object seen wth those eyes, appear
but one for of same reason that unison sounds seem
but one sound. I did think to have sent you what
I fancy may be objected against this notion & so staid
for time to write it down, but upon second thoughts
I had rather reserve it for discourse at our next
meeting: & therefore shal^d only say thanks for
your kind letter & present

Yours
