Nguna Texts:

Now I Know Only So Far Dell H. Hymes, 2003-01-01 In Now I Know Only So Far sociolinguist and ethnopoetic scholar Dell Hymes examines the power and significance of Native North American literatures and how they can best be approached and appreciated Such narratives Hymes argues are ways of making sense of the world To truly comprehend the importance and durability of these narratives one must investigate the ways of thinking expressed in these texts the cultural sensibilities also deeply affected by storytellers particular experiences and mastery of form Included here are seminal overviews and reflections on the history and potential of the field of ethnopoetics Native North American stories from areas ranging from the Northwest Coast to the Southwest take center stage in this book which features careful scrutiny of different realizations and tellings of the same story or related stories Such narratives are illuminated through a series of verse analyses in which patterned relations of lines throw into relief differences in emphasis shape and interpretation A final group of essays sheds light on the often misunderstood and always controversial role of editing and interpreting texts Now I Know Only So Far provides penetrating discussions and absorbing insights into stories and worlds both traditional and new Historical Catalogue of the Printed Editions of Holy Scripture in the Library of the British and Foreign Bible Society, Volume II, 2 T. H. Darlow, H. F. Moule, 2022-08-18 **Creoles, Their Substrates, and Language Typology** Claire Lefebvre, 2011-01-01 Since creole languages draw their properties from both their substrate and superstrate sources the typological classification of creoles has long been a major issue for creolists typologists and linguists in general Several contradictory proposals have been put forward in the literature For example creole languages typologically pair with their superstrate languages Chaudenson 2003 with their substrate languages Lefebvre 1998 or even creole languages are alike Bickerton 1984 such that they constitute a definable typological class McWhorter 1998 This book contains 25 chapters bearing on detailed comparisons of some 30 creoles and their substrate languages As the substrate languages of these creoles are typologically different the detailed investigation of substrate features in the creoles leads to a particular answer to the question of how creoles should be classified typologically The bulk of the data show that creoles reproduce the typological features of their substrate languages This argues that creoles cannot be claimed to constitute a definable typological class **A Grammar of Mavea** Valérie Guérin, 2011-11-30 Spoken on Mavea Island by approximately 32 people Mavea is an endangered Oceanic language of Vanuatu This work provides grammatical descriptions of this hitherto undescribed language Fourteen chapters containing more than 1 400 examples cover topics in the phonology and morphosyntax of Mavea with an emphasis on the latter Of particular interest are examples of individual speaker variation presented throughout the grammar the presence of three linguo labials still used today by a single speaker that were unexpectedly found before the rounded vowel o and a chapter on numerals and the counting system which have long been replaced by Bislama s but are remembered by a handful of speakers Most of the grammatical descriptions derive from a corpus of texts of various genres conversations traditional

stories personal histories etc gathered during the author s fieldwork conducted for eleven months between 2005 and 2007

A Grammar of South Efate Nicholas Thieberger,2006-07-31 This book presents topics in the grammar of South Efate an Oceanic language of Central Vanuatu as spoken in Erakor village on the outskirts of Port Vila It is one of the first such grammars to take seriously the provision of primary data for the verification of claims made in the analysis The research is set in the context of increasing attention being paid to the state of the world s smaller languages and their prospects for being spoken into the future In addition to providing an outline of the grammar of the language the author describes the process of developing an archivable textual corpus that is used to make example sentences citable and playable using software Audiamus developed in the course of the research An included DVD provides a dictionary and finderlist a set of interlinearized example texts and elicited sentences and playable media versions of most example sentences and of the example texts
