Training Planning Manual, Step by Step Jorge Rodriguez Guerra, 2018-02-06 The importance of science applied to sport and your constant improvement has no discussion, much less against pure empiricism. One thing is the practice based on the foundations of science and quite another is the practice without orientation of the laws and principles of sports training. It is necessary a specialized academic training and the support of the doctor, physiologist, psychologist, physiotherapist, because we work with human beings subjected to multiple variables, they are not pieces of wood or iron that when you return the next day you are in the same place and with the same form in which you left it when finishing the work. It is important to know what happens in the body of the athlete when performing a particular exercise and what is the athlete's situation in the other spheres of life that influence personal results and discover new possibilities of the human being with actions that every day astonish more to the world. In this Manual exposed in a very simple and methodical way which is based in addition to the academic training of the author in his experience as coach of the Cuban athletics team.
