Music Outside the Lines Maud Hickey, 2012-11-29 Music Outside the Lines is an informative and practical resource for all who are invested in making music composition an integral part of curriculum Author Maud

Hickey addresses the practical needs of music educators by offering both a well grounded justification for teaching music composition and also a compendium of useful instructional ideas and classroom activities Hickey begins with a rationale for teachers to begin composition activities in their own classrooms with a thoughtful argument that demonstrates that all music teachers possess the skills and training needed to take children along the path toward composing satisfying musical compositions even if they themselves have never taken formal composition lessons She also addresses some of the stickier issues that plague teaching music composition in schools such as assessment notation and technology Most importantly she introduces a curricular model for teaching composition a model which provides an array of composition activities to try in the music classrooms and studios These activities encourage musical and creative growth through music composition while they are organized in logical units corresponding to existing teaching modules they also offer jumping off points for music teachers to exercise their own creative thinking and create music composition activities that are customized to their classes and needs As a whole *Music Outside the Lines* both successfully reasons that music composition should be at the core of school music curriculum and also provides inservice and pre service educators with an essential resource and compendium of practical tips and plans for fulfilling this goal

The Child as Musician Gary E. McPherson, 2015-09-24 The new edition of *The Child as Musician A Handbook of Musical Development* celebrates the richness and diversity of the many different ways in which children can engage in and interact with music It presents theory both cutting edge and classic in an accessible way for readers by surveying research concerned with the development and acquisition of musical skills The focus is on musical development from conception to late adolescences although the bulk of the coverage concentrates on the period when children are able to begin formal music instruction from around age 3 until the final year of formal schooling around age 18 There are many conceptions of how musical development might take place just as there are for other disciplines and areas of human potential Consequently the publication highlights the diversity in current literature dealing with how we think about and conceptualise children s musical development Each of the authors has searched for a better and more effective way to explain in their own words and according to their own perspective the remarkable ways in which children engage with music In the field of educational psychology there are a number of publications that survey the issues surrounding child and adolescent development Some of the more innovative present research and theories and their educational implications in a style that stresses the fundamental interplay among the biological environmental social and cultural influences at each stage of a child s development Until now no similar overview has existed for child and adolescent development in the field of music The *Child as Musician* addresses this imbalance and is essential for those in the fields of child development music education and music cognition
