[System Innovation for a World in Transition](#) Artde Donald Kin-Tak Lam, Stephen D. Prior, Siu-Tsen Shen, Sheng-Joue Young, Liang-Wen Ji, 2023-12-27 System Innovation for a World in Transition Applied System Innovation IX includes the contributions presented at the IEEE 9th International Conference on Applied System Innovation (ICASI 2023) Chiba, Japan, 21-25 April 2023. The conference received more than 600 submitted papers from 12 different countries, whereby roughly one quarter of these papers was selected to present at ICASI 2023. The book aims to provide an integrated communication platform for researchers from a wide range of topics including information technology, communication science, applied mathematics, computer science, advanced material science, and engineering. Hopefully, it will enhance interdisciplinary collaborations between science and engineering technologists in the fields of academics and related industries.

[West to East: A New Global Economy in the Making?](#) Arno J. van Niekerk, 2025-09-19 This book covers new trends in the global economy as a result of geopolitical shifts. Given the rise of the East, especially China and India, and strong Arab economies in the Middle East, clear signs are emerging that the axis of power may be shifting from the West (America and Europe) to the East. This shift, including any intentions towards de-dollarization plus its implications, need to be thoroughly investigated. In addition, the influence of the digital revolution in finance, cryptocurrencies, CBDCs, FinTech, etc., are changing the global landscape. What also cannot be overlooked are the disruptive effects caused by the new Trump administration in the United States on the global economy. A key question is what are the implications of these significant global developments for economic sustainability? Are researchers and policymakers seeing a new form of capitalism emerging, or is it new socialism? Achieving the Sustainable Development Goals (SDGs) remain a high priority to most countries around the world, but the progress of many has been derailed by the COVID-19 pandemic. If economic inclusion as part of the SDGs remains a central objective, these latest developments will have a significant impact on it going forward, especially in view of growing geopolitical tension. The role of global economic institutions will be crucial in furthering globalization or preventing de-globalization. A higher level of international collaboration, especially from an

inclusive economic perspective will be needed to steer the global economy in a direction that will result in genuine economic progress for all Addressing all these aspects the book specifically includes the following special features comparative trends graphs and tables of the geopolitical and geoeconomic shifts over the past few decades illustrations of changes in the financial system new analyses of traditional economic theories e g capitalism and socialism criteria for an inclusive economy and how they help to attain the SDGs new dissections of the digital revolution in the context of the geopolitical shifts and proposals on how to deal with the challenges from a global economic governance perspective Sustainable economic progress is paramount but the challenge of balancing global priorities geopolitical forces and inclusive innovation requires comprehensive investigation In a world where power is fluctuating technologies are transforming the economy and global norms are being rewritten this book offers timely insights into how inclusive and sustainable economic futures can still be imagined and realized

**The Implications of new Technology, particularly Artificial intelligence (AI) for International Politics** Malam Wasai, 2023-09-18 Submitted Assignment from the year 2023 in the subject Politics

General and Theories of International Politics language English abstract Greater scrutiny is necessary because AI will have a significant impact on international relations such as putting new topics on the international agenda challenging geostrategic relations serving as a tool for diplomats and negotiators and creating new opportunities and concerns about protecting human rights. Scholars and diplomats have found it helpful to think about the different things that affect international relations by breaking them down into three levels of analysis individual state and international State level analysis examines the foreign policy behavior of states in terms of state characteristics. For example, some scholars say that all democracies behave a certain way they don't fight with other democracies. Artificial intelligence impact governance As AI continues to evolve and permeate various aspects of our lives its implications for AI and how does it impact businesses AI artificial intelligence refers to machines that can perceive intelligence, synthesize and infer information. It is the science and engineering of intelligent machines that can mimic human intelligence to perform tasks and then on the information they collect improve themselves based AI is designed to significantly enhance human capabilities and contributions making it a valuable business asset
