Low Life:

Low Life Luc Sante, 2003-11-24 A cacophonous poem of democracy and greed like the streets of New York themselves John Vernon Los Angeles Times Book Review Lucy Sante's *Low Life* is a portrait of America's greatest city the riotous and anarchic breeding ground of modernity This is not the familiar saga of mansions avenues and robber barons but the messy turbulent often murderous story of the city's slums the teeming streets scene of innumerable cons and crimes whose cramped and overcrowded housing is still a prominent feature of the cityscape *Low Life* voyages through Manhattan from four different directions Part One examines the actual topography of Manhattan from 1840 to 1919 Part Two the era's opportunities for vice and entertainment theaters and saloons opium and cocaine dens gambling and prostitution Part Three investigates the forces of law and order which did and didn't work to contain the illegalities Part Four counterposes the city's tides of revolt and idealism against the city as it actually was *Low Life* provides an arresting and entertaining view of what New York was actually like in its salad days But it's more than simply a book about New York It's one of the most provocative books about urban life ever written an evocation of the mythology of the quintessential modern metropolis which has much to say not only about New York's past but about the present and future of all cities

Regional Mortality Differences in Germany Eva U.B. Kibele, 2012-10-01 Regional mortality differences are one dimension of health inequalities but its trends and determinants in Germany are widely unknown This book examines and illustrates patterns of regional mortality in Germany with focus on small area differentials and their changes over time It identifies explanatory factors at individual and regional level Mortality differences between eastern and western Germany exist but small area mortality differentials are often greater Though the main spatial mortality patterns remain this study provides evidence that some distinct changes in the small area mortality patterns in Germany especially among women occurred within a short period of time Mortality inequalities at younger ages and in behavior related causes as well as differences in socioeconomic conditions contribute strongly to regional mortality differences in Germany The book shows that the complex interplay between individual and regional level mortality risk factors requires a multidimensional approach to

reduce regional mortality inequalities

The Coming Generational Storm Laurence J. Kotlikoff, Scott Burns, 2005-01-18

AS URGENT AS EVER

Nonpartisan policy recommendations and personal strategies for protecting against skyrocketing tax rates reduced benefits high inflation and ruined currency Lays out in easy to understand prose why Social Security and Medicare need a comprehensive overhaul Los Angeles Times In 2030 as 77 million baby boomers hobble into old age walkers will outnumber strollers there will be twice as many retirees as there are today but only 18% more workers How will America handle this demographic overload How will Social Security and Medicare function with fewer working taxpayers to support these programs According to Laurence Kotlikoff and Scott Burns we'll see skyrocketing tax rates drastically lower retirement and health benefits high inflation a rapidly depreciating dollar unemployment and political instability But to solve a problem you must first understand it Kotlikoff and Burns take us on a guided tour of our generational imbalance first introducing us to the baby boomers and the fiscal child abuse that will double the taxes paid by the next generation There's also the deficit delusion of the underreported national debt None of this will be solved by any of the popularly touted remedies cutting taxes technological progress immigration foreign investment or the elimination of wasteful government spending So how can the United States avoid this demographic fiscal collision Kotlikoff and Burns propose bold new policies including meaningful reforms of Social Security and Medicare Their proposals are simple straightforward and geared to attract support from both political parties Kotlikoff and Burns also offer a life jacket guidelines for individuals to protect their financial health and retirement This paperback edition has been revised and updated and includes a new foreword by the authors

The Roots of Violent Crime in America Barry Latzer, 2021-03-17

The Roots of Violent Crime in America is criminologist Barry Latzer's comprehensive analysis of crimes of violence including murder assault and rape in the United States from the 1880s through the 1930s Combining the theoretical perspectives and methodological rigor of criminology with a synthesis of historical scholarship as well as original research and analysis Latzer challenges conventional thinking about violent crime of this era While scholars have traditionally cast American cities in the late nineteenth and early twentieth centuries as dreadful places Latzer suggests that despite overcrowding and poverty U.S. cities enjoyed low rates of violent crime especially when compared to rural areas The rural South and the thinly populated West both suffered much higher levels of brutal crime than the metropolises of the East and Midwest Latzer deemphasizes racism and bigotry as causes of violence during this period noting that while many social groups confronted significant levels of discrimination and abuse only some engaged in high levels of violent crime Cultural predispositions and subcultures of violence he posits led some groups to participate more frequently in violent activity than others He also argues that the prohibition on alcohol in the 1920s did not drive up rates of

violent crime Though the bootlegger wars contributed considerably to the murder rate in some of America's largest municipalities Prohibition also eliminated saloons which served as hubs of vice corruption and lawlessness The Roots of Violent Crime in America stands as a sweeping reevaluation of the causes of crimes of violence in the United States between the Gilded Age and World War II compelling readers to rethink enduring assumptions on this contentious topic **Henry George and His Gospel** Digby Cotes Pedder, 1908 **Coffee and Waffles** Alice Foote MacDougall, 1926 **The Heart of Hawthorne's Journals** Nathaniel Hawthorne, 1929 *The Browning Society's Papers* Browning Society (London, England), 1885 **Wrestling and Waiting** John Fothergill Waterhouse Ware, 1882 A History of English Literature John Buchan, 1923 *Works* Robert Browning, 1899 **The Garden Magazine**, 1907 *British Books*, 1916 **XX Century Cyclopaedia and Atlas** Ainsworth Rand Spofford, Charles Annandale, 1901 Insurance World, 1911 **The Retrospect of Practical Medicine and Surgery** William Braithwaite, James Braithwaite, Edmond Fauriel Trevelyan, 1879 Being an analysis of the British and foreign medical journals and transactions or a selection of the latest discoveries and most practical observations in the practice of medicine surgery and the collateral sciences for the past year made chiefly with reference to the treatment of disease *Waterworks Handbook of Design, Construction and Operation*, 1927
