Goodyear,2014-02-27 Testosterone provides the hormonal foundation for masculinity determining what it means to be male So what does a global decline in testosterone levels say about the current generation of men Why is the greatest testosterone decline seen in American men under the age of thirty A broken reactive medical system isn t concerning itself with answering these questions The medical profession classifies testosterone loss as testicular dysgenesis syndrome Calling a condition a syndrome however is just a fancy medical term for we don t know why this is happening When a condition is classified as a syndrome the symptoms receive treatment not the cause Nathan Goodyear MD rejects reactive approaches to testosterone loss as well as the pharmacological marketing that sees low testosterone as the latest cash cow Instead he offers a solution Dr Goodyear argues that low testosterone results from eight specific causes backing up his claim with hard scientific facts and outlining treatment options for each cause With proper treatment low testosterone levels can be reversed
