

Lower Extremity Amputation

Phillip Page, Todd S. Ellenbecker

Lower Extremity Amputation:

Lower Extremity Amputation Wesley S. Moore, 1989

Physical Therapy Gertrude Mensch, Patricia M. Ellis, 1986

Practical guide featuring easy to understand explanations of the complex medical and rehabilitation problems of lower extremity amputees. Gives clinical guidelines for treatment at each level of amputation with handy reference charts and over 300 photographs.

Lower Limb Amputation Adrian Cristian, 2005-09. Limb loss can occur due to trauma, infection, diabetes, vascular disease, cancer, and other diseases. Lower limb amputation is relatively common and has a profound impact on a person's life regardless of the cause. Feelings of loss and grief, difficulties in learning to walk with an artificial limb, and readjustment to an interrupted life all pose considerable challenges. Nevertheless, there are countless stories of people who have successfully overcome these problems. This book provides the practical knowledge needed to cope with the life changes caused by lower limb amputation. It demystifies the medical process and technical jargon by using plain, easily understandable language. And it is the first book to combine medical, prosthetic, and psychosocial factors in one convenient volume, including causes of lower limb amputation, especially diabetes, and ways to prevent further amputation. Surgical techniques for lower limb amputation, learning to walk with a prosthesis, the unique challenges faced by children and elderly people living with an amputation, exercising and sports with a lower limb prosthesis, and much more. The outlook of this book is ultimately an optimistic one. Well-informed, knowledgeable individuals with amputations are better able to take care of themselves and are more effective self-advocates. This book gives them the tools they need to forge a productive, satisfying, and high-quality life.

Lower Extremity Amputation Linda A. Karacoloff, Frederick J. Schneider, 1986

Comprehensive Guide to Lower Extremity Amputations

Anahita Dua, 2020. This text serves as a comprehensive guide for the care of patients requiring lower extremity major amputations. It details the indications, technicalities, and procedural steps, risks, and benefits to above-knee, below-knee, and through-knee amputations. The textbook also details aspects regarding quality of amputation care, epidemiology of this disease, and psychiatric considerations when managing patients with lower extremity amputation.

Lower Extremity Amputation Linda A. Karacoloff, Carol Stube Hammersley, Frederick J. Schneider, 1992. This Second Edition of Lower Extremity Amputation provides a fresh look at the framework and process for clinical treatment. This complete reference is filled with current practice methods and illustrations to reflect the advancements in the field of prosthetics.

Lower Limb Amputations Gloria T. Sanders, Bella J. May, 1986. The primary initial effort in every case of disease or injury should be to save the extremity. Amputation is seldom necessary following bone and joint injuries. More often, it is an admission of defeat in the medical management of the patient with vascular disease. In such cases, it should be performed only as a last resort. The longest possible lever arm consistent with primary healing should be maintained for maximum proprioceptive and kinesthetic feedback and thus rehabilitation potential.

Prosthetic Restoration and Rehabilitation of the Upper and Lower Extremity Mary Catherine Spires, PT, MD, Brian Kelly, DO, Alicia Davis, MPA,

Lower Extremity Amputation Study Gora Bangi,University of Newcastle upon Tyne. Department of Epidemiology and Public Health,1997

Limb Amputation R. Ham,L. T. Cotton,2013-12-20 The majority of amputations in the western world today are due to vascular disease Despite the advances in surgical treatment of this disease particularly by reconstruction it is a sad fact that the number of amputations performed in these countries each year for vascular disease is increasing Most of these amputees are elderly and their life expectancy is short so it is important that the treatment and rehabilitation that they receive is informed appropriate efficient and swift to enable them to return successfully to life in the community for their remaining years Management of this group of patients has proved to be successful only if a multidisciplinary team approach is adopted Until recently in the UK this approach sadly has only been implemented by a few centres However with the publication of the McColl report into the prosthetic and wheelchair service in 1986 interest in the care of the amputee is growing throughout the country This book covers all aspects of amputation from disease and diagnosis to rehabilitation and community discharge with emphasis on the man agerneut of the largest group the vascular lower limb amputee A team approach is described and emphasized as being essential for good results and subsequent successful return into the community The role of each of the important disciplines is described in relation to the appropriate part of the rehabilitation phase
