Materials Management Systems:

Materials Management Systems Robert Goodell Brown, 1984 Materials Management Rajendra Mishra, 2009

Materials management is an essential business function. It is concerned with managing materials, one of the four basic resources: labour, material, equipment, and capital. Until recently, it was concerned with purchasing raw materials and very few parts from local markets. Raw materials were used to make most of the parts for making end products. Materials management was regarded as a routine function and was given less importance. But over the years, firms began to procure more and more parts and subassemblies from local as well as global markets. Today, over 50% of the revenue of the firms goes for procuring materials, parts, and subassemblies from outside. As a result, the materials management function has evolved from a clerical buying function into a strategic business function that helps firms to survive and grow. It creates a competitive edge by creating superior value by delivering quality product or service on time and offering lower cost by cutting its own cost as well as cutting purchased item cost. Very few of the available texts offer a comprehensive view of the subject. Data and examples and cases in the context of Indian industries are limited. The contents of the subject are undergoing rapid changes. Earlier purchasing was mostly confined to raw materials by manufacturing firms, whereas now a large part of it consists of parts, subassemblies, and assemblies besides raw materials. A smaller number of suppliers are preferred now a days. Global sourcing is an accepted norm. A change in supplier relations from adversarial to partnership is evident. Lot sizes and lead times are smaller, and there is greater use of information technology. The book is designed to provide comprehensive coverage of the field of materials management by including emerging concepts, practices, tools, techniques, heuristics, and quantitative models. Other features of the book include v Important topics like outsourcing, purchase strategies, and enterprise resource planning v Cases from Indian industries on vendor managed inventory, outsourcing, and spare parts inventory v Definition of key terms v Questions at the end of each chapter and answers of selected questions. The book can serve as a text for undergraduate and postgraduate level courses on materials management in the institutes of management engineering and technology, materials industrial engineering, operations research, and others. It can also serve as a reference for managers, engineers, consultants, and others interested in the field.

Ross,2012-12-06 It has been said that every generation of historians seeks to rewrite what a previous generation had established as the standard interpretations of the motives and circumstances shaping the fabric of historical events It is not that the facts of history have changed No one will dispute that the battle of Waterloo occurred on June 11 1815 or that the allied invasion of Europe began on June 6 1944 What each new age of historians are attempting to do is to reinterpret the motives of men and the force of circumstance impacting the direction of past events based on the factual social intellectual and cultural milieu of their own generation By examining the facts of history from a new perspective today s historians hope to reveal some new truth that will not only illuminate the course of history but also validate contemporaneous values and societal ideals Although it is true that tackling the task of developing a new text on logistics and distribution channel management focuses less on schools of philosophical and social analysis and more on the calculus of managing sales campaigns inventory replenishment and income statements the goal of the management scientist like the historian is to merge the facts and figures of the discipline with today s organizational cultural and economic realities Hopefully the result will be a new synthesis where a whole new perspective will break forth exposing new directions and opportunities **Service Management Systems** David P.
