Lesson Objective

Students will be able to demonstrate their understanding of addition and subtraction through original movement which demonstrates the principles of dance.

Lesson Overview

Movement in the classroom is a natural way to increase blood and oxygen flow, which enhances and promotes cognitive development. It also make learned concepts stay with students more effectively. Using this knowledge, and realizing that the concepts of addition and subtraction will lay the groundwork for many years to come in the area of math, this lesson will ask students to physicalize the definitions of and demonstrate their understanding of the concepts.
