*Reader's Choice* Sandra Silberstein, Barbara K. Dobson, Mark A. **Talking through Reading and Writing** Daniel Rose, Christine Walsh, 2020-11-11 In this book you will read many examples of rich literacy conversations between a teacher and his 8th grade students that never would have occurred face to face in the classroom. These conversations take place online when 8th graders write to their teacher about the books they're interested in reading and choosing to read independently. Students write about what happens when they read or don't read, how they feel about reading, how they're connecting with characters and ideas, why they don't have enough time to read, and what their reading goals are. And their teacher writes back to them. Every week. After each conversation, you will read some meta talk that shines a light on what the conversation has taught us about this language learner and how this data is informing our beliefs and practices. Embedded within the chapters are suggested resources, articles, book recommendations, links, websites, blogs, etc. you can follow should you want to read more in that chapter. What these students reveal about their own literacy development, their successes, their challenges, their lives, and how their teacher nudges them along socially, emotionally, and academically, teach us the value and power of one practical, authentic literacy tool: the Reading Conversation Journal.

**Reading across the Disciplines** Karen Manarin, 2022-05-03 Reading Across the Disciplines offers a collection of twelve essays detailing a range of approaches to dealing with students' reading needs at the college level. Transforming reading in higher education requires more than individual faculty members working on SoTL projects in their particular fields. Teachers need to consider reading across the disciplines. In this collection, authors from Australia and North America teaching in a variety of disciplines explore reading in undergraduate courses, doctoral seminars, and faculty development activities. By paying attention to the particular classroom and placing those observations in conversation with scholarly literature, they create new knowledge about reading in higher education from disciplinary and cross-disciplinary perspectives. Reading Across the Disciplines demonstrates how existing research about reading can be applied to specific classroom contexts, offering models for faculty members whose own research interests may lie elsewhere but who believe in the importance of reading.

**Report of the State Superintendent** New York (State). Department of Public Instruction, 1902     Report of the Superintendent of Public Instruction of the State of New York New York (State).
