Low N Slow:

Fuzzy Systems Engineering Nadia Nedjah,Luiza de Macedo Mourelle,2005-05-20 This book is devoted to reporting innovative and significant progress in fuzzy system engineering Given the maturation of fuzzy logic this book is dedicated to exploring the recent breakthroughs in fuzziness and soft computing in favour of intelligent system engineering This monograph presents novel developments of the fuzzy theory as well as interesting applications of the fuzzy logic exploiting the theory to engineer intelligent systems

Classic Papers ,2004-07-02 Advances in Ecological Research was first published in 1962 and has become one of Academic Press most prestigious and successful series In 1999 the Institute for Scientific Information released figures indicating this serial has an impact factor of 9.6 and a half life of 10.0 years ranking it first in the highly competitive category of Ecology This volume continues to publish topical and important reviews and interprets ecology to include all material that contributes to our understanding of the field Advances in Ecological Research presents a wide range of papers on all aspects of ecology Topics include the physiology populations and communities of plants and animals as well as landscape and ecosystem ecology

Machines of Youth Gary S. Cross,2018-05-04 For American teenagers getting a driver's license has long been a watershed moment separating teens from their childish pasts as they accelerate toward the sweet freedom of their futures With driver's license in hand teens are on the road to buying and driving and maybe even crashing their first car a machine which is home to many a teenage ritual being picked up for a first date parking at a scenic overlook or blasting the radio with a gaggle of friends in tow So important is this car ride into adulthood that automobile culture has become a stand in a shortcut to what millions of Americans remember about their coming of age Machines of Youth traces the rise and more recently the fall of car culture among American teens In this book Gary S Cross details how an automobile obsession drove teen peer culture from the 1920s to the 1980s seducing budding adults with privacy freedom mobility and spontaneity Cross shows how the automobile redefined relationships between parents and teenage children becoming a rite of passage producing new courtship rituals and fueling the growth of numerous car subcultures Yet for teenagers today the lure of the automobile as a transition to adulthood is in decline Tinkerers are now sidelined by the advent of digital engine technology and premolded body construction while the attention of teenagers has been captured by iPhones video games and other digital technology And adults have become less tolerant of teens on the road restricting both cruising and access to drivers licenses Cars are certainly not going out of style Cross acknowledges but how upcoming generations use them may be changing He finds that while vibrant enthusiasm for them lives on cars may no longer be at the center of how American youth define themselves But for generations of Americans the modern teen experience was inextricably linked to this particularly American icon

Misplaced Objects Silvia Spitta,2009-07-01 When things move things change Starting from this deceptively simple premise Silvia Spitta opens a

fascinating window onto the profound displacements and transformations that have occurred over the six centuries since

material objects and human subjects began circulating between Europe and the Americas. This extended reflection on the dynamics of misplacement starts with the European practice of collecting objects from the Americas into Wunderkammern literally cabinets of wonders. Stripped of all identifying contexts these exuberant collections including the famous Real Gabinete de Historia Natural de Madrid upset European certainties forcing a reorganization of knowledge that gave rise to scientific inquiry and to the epistemological shift we call modernity. In contrast cults such as that of the Virgin of Guadalupe arose out of the reverse migration from Europe to the Americas. The ultimate marker of mestizo identity in Mexico the Virgin of Guadalupe is now fast crossing the U.S. Mexico border and miracles are increasingly being reported. *Misplaced Objects* then concludes with the more intimate and familial collections and recollections of Cuban and Mexican American artists and writers that are contributing to the Latinization of the United States. Beautifully illustrated and radically interdisciplinary *Misplaced Objects* clearly demonstrates that it is not the awed viewer but rather the misplaced object itself that unsettles our certainties allowing new meanings to emerge. *Emerging Research in Computing, Information, Communication and Applications* N. R. Shetty, N. H. Prasad, N. Nalini, 2015-07-17. This proceedings volume covers the proceedings of ERCICA 2015. ERCICA provides an interdisciplinary forum for researchers, professional engineers and scientists, educators and technologists to discuss, debate and promote research and technology in the upcoming areas of Computing, Information, Communication and their Applications. The contents of this book cover emerging research areas in fields of Computing, Information, Communication and Applications. This will prove useful to both researchers and practicing engineers.
