Monitoring Food Waste and Loss in the Nordic region: Definitions, methods and measures for prevention Hanssen, Ole Jørgen, Östergren, Karin, Hartikainen, Hanna, Andersson, Tova, 2021-03-26 Available online <https://pub.norden.org/temanord2021/504> The background for the project is that EU Commission has introduced new regulations and policies for food waste prevention and monitoring. Sweden and Denmark link their reporting closely to the waste framework directive while Finland and Norway base their most data collection on voluntary reporting. Norway and Finland report on a detailed level and estimate impact like costs and GHG emissions. All Nordic countries have necessary detail in data that are measured to fulfil the requirements set by the purpose of food waste monitoring program. Halving food waste by 2030 calls for radical changes in the food chain. These radical changes require four dimensions: technology, push, societal pull, market pull and regulatory push. Based on these four dimensions we have classified measures to reduce food waste into four topics: Policy instruments, changing social norms, nudging and changing practices, and intelligent technology and new products/business models.

*Kartläggning av matsvinnet i primärproduktionen* Ulrika Franke, 2013-11-06 Mat slängs i alla delar av livsmedelskedjan. Det finns statistik på hur mycket som kastas i flera led av kedjan men för primärproduktionen alltsjälv. Jordbrukskårens verksamhet saknas tillflörlitliga siffror på hur stort svinnet är i ett projekt med representanter från Danmark, Finland, Norge och Sverige. Vi först kartlägger svinnet i fem vanliga produktgrupper: mjölk, griskött, morötter, lök och potatis. Resultaten visar att en stor del av maten går förlorad redan i primärproduktionen. Svinnet av mjölk och griskött har de största konsekvenserna för producenternas ekonomi, men även odlingsmark och klimatet berör om svinnet i produktionen procentuellt sett. Detta har betydelse för morötter, lök och potatis. Konsumenternas krav kan ge upphov till svinnen i primärproduktionen, särskilt för frukt och grönsaker.

**Glycemic Index from Research to Nutrition Recommendations** Nordic Council of Ministers, 2005 Epidemiological and intervention studies have increased both public and expert awareness of the possible importance of blood sugar regulation and the varying glycemic index of foods in the etiology and treatment of chronic diseases. Generally a low glycemic index diet is considered beneficial due to less incremental increase in blood levels of glucose than with a high glycemic index diet. Nordic dietary habits include a large number of carbohydrate rich food items many of which are likely to fall into the category of high glycemic index. Evaluation of the evidence and the practical implications of these studies on nutrition recommendations have to be clarified. The report sheds a light to the strengths and weaknesses of the glycemic index.
