Materialism And The Mind Body Problem:

Materialism and the Mind-body Problem David M. Rosenthal,2000-01-01 Expanded and updated to include a wide range of classic and contemporary works this new edition of David Rosenthal s anthology provides a selection of the most important and influential writings on materialism and the mind body problem **Mind and Brain** Rocco J. Gennaro,2020-03-01 Since its publication in 1996 many thousands of students have first encountered key issues in the philosophy of mind in the pages of Rocco J Gennaro s introductory work Mind and Brain A Dialogue on the Mind Body Problem In this new edition Gennaro updates and expands the work to reflect current topics and discussions The dialogue provides a clear and compelling overview of the mind body problem suitable for both introductory students and those who have some background in the philosophy of mind Topics include ImmortalityMaterialism Descartes Divisibility Argument for substance dualismThe Argument from Introspection for substance dualismThe main objections to dualismThe interaction between mind and brainThe relation between brain damage and the prospect of an afterlifeParallelism and epiphenomenalismThe type token distinction within materialism and the problem of multiple realizability Arguments against materialism and its ability to explain consciousnessProperty dualism and panpsychismThe epistemological problem of other mindsThe nature of inductive knowledgeEvidence for animal consciousnessThe problem of machine or robot mindsThe inverted spectrum argument Also included are a brief Introduction a list of Study Questions designed to enhance classroom discussion and serve as a resource for the development of paper topics a Glossary and an Index of Key Terms **Emergent Materialism** Selton Luke Peters,1995 An introduction to some of the major objections against traditional materialism Topics include the identity of mental and physical events the question of the existence of irreducibly psychic properties the function of consciousness and the problem of personal identity *A Materialist Theory of the Mind* D.M. Armstrong,2002-09-11 Breaking new ground in the debate about the relation of mind and body David Armstrong s classic text first published in 1968 remains the most compelling and comprehensive statement of the view that the mind is material or physical In the preface to this new edition the author reflects on the book s impact and considers it in the light of subsequent developments He also provides a bibliography of all the key writings to have appeared in the materialist debate **The Mind-Body Problem** Mario Bunge,2014-05-09 The Mind Body Problem A Psychobiological Approach examines the mind body problem from a psychobiological perspective It intends to show that the idea of a separate mental entity is not only unwarranted by the available data and the existing psychological models but collides head on with the most fundamental ideas of all modern science and is thus a stumbling block to progress The book abandons ordinary language in favor of the state space language which is mathematically precise and is shared by science and scientific philosophy Comprised of 10 chapters this monograph begins with an overview of the mind body problem and its main proposed solutions classified into main genera psychophysical monism and psychophysical dualism In particular ten views on the mind body problem are analyzed along

with three main varieties of materialism with regards to the problem eliminative reductive or leveling and emergentist The discussion then turns to the notion of a concrete or material system based on the assumption that behavior is an external manifestation of neural processes Subsequent chapters explore the specific functions of the central nervous system sensation and perception behavior and motivation memory and learning thinking and knowing and consciousness and personality The book also considers sociality and social behavior in animals before concluding with an assessment of a psychological explanation of the mind with emphasis on dualism and monism This work will be of interest to students academicians practitioners and investigators in the fields of psychobiology psychology neurophysiology and philosophy

Materialism,

Minds, and Cartesian Dualism Robert Francis Almeder,2022-03-11 Materialism Minds and Cartesian Dualism offers a history of how philosophers and scientists have thought about mind body problems especially as it concerns the question of consciousness after death This book interrogates the last thirty years of scientific research on reincarnation considering a series of case studies impossible to explain in any other way than persisting consciousness after death Although this book does not attempt to argue why or how some people reincarnate and how long they reincarnate It argues that these case studies demonstrate in compelling ways that some people have indeed to some degree reincarnated Therefore the philosophical materialist position that only physical objects exist is refuted

Modern Materialism and the Mind-body

Problem Paul M. Stofleth,1972 Subjectivity And Reduction Barbara Hannan,2019-07-09 Contemporary philosophy has seen a proliferation of complex theories and intricate arguments brought to bear on the mind body problem perhaps the most intractable of perennial philosophical problems In this concise and accessible text Barbara Hannan provides an elegant introduction to this contemporary debate Her emphasis is upon the clear and even handed presentation and evaluation of the major theories of the mind but she does not shrink from contributing to the advancement of the argument including the presentation of an original account the theory of content internalism Along the way to the formulation of this account Hannan puts into context and discusses the views of all the major contemporary philosophers writing on the mind including Lewis Putnam Searle Davidson Dennett and Fodor Combining a deep respect for the depth of the issues with clarity of thought and lucidity of expression Subjectivity and Reduction is the ideal introduction to the central problem of today s philosophy of mind

Critique of the Psycho-Physical Identity Theory Eric P. Polten,2019-05-20 No detailed description available for Critique of the Psycho Physical Identity Theory

Materialism and the Mind/body Problem Wesley E. Cooper,1976

Body And Soul Kelly Nicholson,1997-02-13 There are certain questions that lie at the heart of our existence Who are we What is this life in which we find ourselves engaged Is reality as intelligible as what is before our eyes or is there something more beyond Philosophers have in response to these questions tended to favor one of two antithetical approaches an understanding of the material world through the lens of science or a model based on the existence of a spiritual realm a world beyond the senses Although Nicholson does not claim to disprove a materialist account of reality he argues that our

allegiance to certain commonsense assumption about ourselves and the world that for example we are rational and purposive creatures that some courses of action are truly better than others that human experience on the whole is basically trustworthy involves us implicitly in a worldview that is spiritual in its basis nonmaterialistic at the core Nicholson's book is a philosophically astute exploration into the nature of human existence In presenting the topic he examines at length issues in ethics philosophy of the mind metaphysics and the philosophy of religion He introduces readers to such concepts as mind body dualism moral relativism logical positivism naturalism and reductionism as well as to the key thinkers in these debates from the ancient Greek philosophers to Hume Ayer Searle and Swinburne

Matter and Consciousness Paul M. Churchland, 1988 In **Matter and Consciousness** Paul Churchland clearly presents the advantages and disadvantages of such difficult issues in philosophy of mind as behaviorism reductive materialism functionalism and eliminative materialism This new edition incorporates the striking developments that have taken place in neuroscience cognitive science and artificial intelligence and notes their expanding relevance to philosophical issues Churchland organizes and clarifies the new theoretical and experimental results of the natural sciences for a wider philosophical audience observing that this research bears directly on questions concerning the basic elements of cognitive activity and their implementation in real physical systems How is it he asks that living creatures perform some cognitive tasks so swiftly and easily where computers do them only badly or not at all Most significant for philosophy Churchland asserts is the support these results tend to give to the reductive and the eliminative versions of materialism A Bradford Book

Contemporary Materialism Paul K. Moser, J. D. Trout, 1995 **Contemporary Materialism** presents an important collection of recent work on materialism in connection with metaphysics philosophy of language philosophy of mind and theories of value This anthology charts the contemporary problems positions and themes on the topic of materialism It illuminates materialism's complex intersection with related subjects such as cognition and psychology By gathering a wide range of philosophical interventions around the subject of materialism this anthology provides a valuable discussion of how materialism can effectively serve the purposes of philosophical assessment To further assist the reader it also contains an extensive bibliography on contemporary materialism

Metaphysics and the Mind-body Problem Michael E. Levin, 1979 Defends the ancient thesis that man is a piece of matter that all his states are physical states and all his properties physical properties This is done in a metaphysical framework which accommodates talk of the identity and diversity of such virtual entities as states and properties without being committed to their actual existence

Studies on Mario Bunge's Treatise Paul Weingartner, Georg J. W. Dorn, 1990

Matter and Mind Mario Bunge, 2010-09-14 This book discusses two of the oldest and hardest problems in both science and philosophy What is matter and What is mind A reason for tackling both problems in a single book is that two of the most influential views in modern philosophy are that the universe is mental idealism and that the everything real is material materialism Most of the thinkers who espouse a materialist view of mind have obsolete ideas about matter whereas those

who claim that science supports idealism have not explained how the universe could have existed before humans emerged Besides both groups tend to ignore the other levels of existence chemical biological social and technological If such levels and the concomitant emergence processes are ignored the physicalism spiritualism dilemma remains unsolved whereas if they are included the alleged mysteries are shown to be problems that science is treating successfully *Perception, Mind and Personal Identity* David H. Lund,1994-09-06 The book is primarily a critique of a materialistic view of persons and their experiences Its subject matter is quite broad as it includes a consideration of not only whether there can be an adequate materialist treatment of sensations consciousness and intentionality of thought but also of whether there can be such a treatment of perceptual experience on the one hand and of self consciousness on the other It presents a case for concluding that the difficulties facing the materialist are overwhelming Mind and Materialism Geoffrey Madell,1988 MIND AND BRAIN Rocco J. Gennaro,2020

Physicalism Deconstructed Kevin Morris,2018-11-29 How should thought and consciousness be understood within a view of the world as being through and through physical Many philosophers have proposed non reductive levels based positions according to which the physical domain is fundamental while thought and consciousness are higher level processes dependent on and determined by physical processes In this book Kevin Morris's careful philosophical and historical critique shows that it is very difficult to make good metaphysical sense of this idea notions like supervenience physical realization and grounding all fail to articulate a viable non reductive levels based physicalism Challenging assumptions about the mind body problem and providing new perspectives on the debate over physicalism this accessible and comprehensive book will interest scholars working in metaphysics philosophy of mind and philosophy of science
